ACKNOWLEDGEMENTS

I firstly thank Allah for His unconditional love and blessings throughout the entirety of my research conception and completion. I then would thank my supervisor and mentor Sir Shaheer Ellahi Khan who has been pivotal via his experience and intellect that empowered and guided me to synthesize the vast knowledge(s) and produce my original and pioneering masterpiece.

I would extend my thanks to Fight Fortress and Team Fight Fortress, that have been embracing and supportive in my experiences prior and during research, providing the propitiousness for me to have in-depth discussions and knowledge acquisition for my research. To Ehtisham Karim Shaheen, who aided me in ensuring that I complete my data collection in the time of COVID-19.

I would also like to thank my peers, friends and family that have been there always and stood by my side, in good times and bad times. To my mother and father, who have always emphasized and advocated the vitality of education for anything and everything and groomed me to be a wholesome human.

Lastly, I would thank my prime inspirations and mentors Bruce Lee, Muhammad Ali and Jalaluddin Rumi that have been a source of enlightenment where and when no one could not be or have not been. Pioneers and revered, they are the reason I gratefully had the inception to forge my research. For the helpless and the voiceless, I hope my work may come in need and aid you to prospects, welfare and utility you ever more deserve.
