Head of Department

ACKNOWLEDGEMENT

We are very thankful to our supervisor Mr Fazal Wahab for guiding us in every phase of the project. We also thank Mr Raja Suleman and Mr Rizwan Amir for helping us in designing the database. We our also thankful to our friends Mohammad Mohsin Idrees, Ubaid Asghar and Zeeshan Siddique for helping us from time to time.

DEDICATED

"We dedicate this project to our parents and our friends"

ABSTRACT

University Management System (UMS) is a complete integrated, Internet and Intranet based web application, which is designed to computerize the daily tasks performed by faculty and students. Motive behind developing such a system is that currently all the students and faculty records are maintained manually. There is no effective way of communication between the students and faculty. UMS consists of fully independent functional modules having major features like Send SMS, Application and Complaint handling and student and faculty profiles, designed to provide efficient and an effective way of communication between students and faculty members. The outcome of the system is to reduce the manual work of the daily tasks performed by the faculty and the students.

TABLE OF CONTENTS

Contents

INTRODUCTION 1

1.1 Intended Audience and Reading Suggestions 1

1.2 Project Scope 1

1.3 Business Case 2

1.4 Features: 3

ANALYSIS OF THE EXISTING SYSTEM 4

2.1 Drawbacks 4

PROPOSED SYSTEM 6

3.1 Problem statement 6

3.2 Proposed solution 6

3.3 Path line 7

3.4 Project Plan 7

3.4.1 Statement of Work 7

3.4.2 Work Breakdown Structure 9

3.5 Tools/Hardware: Following are the main tools which were used in the development of the application: 10

3.6 Data Flow Diagrams: 10

SOFTWARE REUIREMENT SPECIFICATION 10

4.1 Functional Requirements 10

4.1.1 Login 10

User can access the application by giving the correct username, password and the type. The user will be directed to his/her own personal profile according to each level defined above. 10

4.1.2 Faculty 10

- Home 10

Faculty member is able to see their personal information which is retrieved from the database. 10

- Edit 11
Faculty member can update his/her information. The information will also be updated in the database. 11
4.1.3 Student 12
- Edit 12
Student can update his/her information. The information will also be updated in the database. 12
4.1.4 Admin 13
4.1.5 Course Coordinator 14
- Home 14
Course Coordinator is able to see their personal information which is retrieved from the database. 14
- Edit 14
Course Coordinator can update his/her information. The information will also be updated in the database. 14
4.1.6 Project Coordinator 16
- Home 16
Project Coordinator is able to see their personal information which is retrieved from the database. 16
- Edit 16
Project Coordinator can update his/her information. The information will also be updated in the database. 16
4.1.7 Head Of Department 17
- Home 17
HOD is able to see their personal information which is retrieved from the database. 17
- Edit 17
HOD can update his/her information. The information will also be updated in the database. 17
4.2 Non Functional Requirements: 19
4.2.1 Response Time: 19
4.2.2 Security Requirements 19
4.2.3 Software Quality Attributes 19
4.3 USE CASES Following are some of the important use cases of the system: 20
4.3.1 Login 20
4.3.2 Home 21
4.3.3 Edit Profile 22

4.3.4 Upload Profile Picture 23
4.3.5 Upload Research Paper 24
4.3.6 Delete Research Paper 25
4.3.7 Upload CV 26
4.3.8 Delete CV 27
4.3.9 Upload Course Details: 28
4.3.10 Send SMS 29
4.3.11 View Time Table 30
4.3.12 Upload Project Report 31
4.3.13 Delete Project Report 32
4.3.14 Download Research Paper 33
4.3.15 Download CV: 34
4.3.16 Download Course Details 35
4.3.17 Send Application 36
4.3.18 Check Application Status: 37
4.3.19 Add Faculty: 38
4.3.20 Delete Faculty: 39
4.3.21 Add Student: 40
4.3.22 Delete Student: 41
4.3.23 Add Course 42
4.3.24 Delete Course 43
4.3.25 Change Faculty Position: 44
4.3.26 Receive Application: 45
4.3.27 Receive Project Report 46
4.3.28 Send Notification 47
SYSTEM DESIGN 48
5.1 System Architecture:- 48
5.2 Database Design:- 49
5.3 Process Diagram 50
5.4 Class Diagram 51
IMPLEMENTATION 52
6.1 Introduction 52
6.2 Implementation 52
TESTING 57

7.1 Introduction 57
7.2 Test Plan 57
7.3 Operational Environment: 57
7.4 Hardware Requirement: 57
7.5 Test Cases: 58
7.5.1 Successful Test Cases: 58
7.5.2 Failure Test Case: 61
USER MANUAL 64
8.1 Login: 64
8.2 Profile: 65
8.3 Send Application: 66
8.4 Thesis: 67
8.5 Courses: 68
8.6 Upload Research Papers: 69
8.7 Show Applications: 70
CONCLUSION AND FUTURE ENHANCEMENT 71
9.1 Conclusion 71
9.2 Future Enhancement 72
