ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, Miss FASIHA IKRAM for her invaluable advice, guidance and her enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

UBIQUITOUS COMPUTING FOR BUSINESS PROCESS IMPROVEMENT

ABSTRACT

The objective of this project is to research on how the traditional Pakistani market responds to ubiquitous computing techniques. This will be achieved by developing Android application that allows florists, marriage lawns and caterers to list themselves. The application will also allow customers to view the details of these vendors.
