Abstract

Clinical Decision Support System for Hospital provides the benefits of streamlined operations, enhanced administration and control, superior patient care, strict cost control and improved profitability. It is a powerful, flexible, and easy to use and is designed and developed to deliver real conceivable benefits to hospitals. More importantly it is backed by reliableand dependable support.

Acknowledgments

Above all, we thank to **Allah (SWT)**, the most Merciful and the most Beneficent, who gave us the opportunity to achieve education of higher level. We would also like to thank our Supervisor **Miss** Sahar Arshad (Senior Lecturer) whose support, guidance and reassurance from the start till end, helped us to complete our project. It would have not been completed without her proper guidance and support. The support of our teachers also helped us along the way and lastly, we would like to thank **Bahria University, Islamabad** for allowing us to develop this application through their platform.
