APPROVAL FOR EXAMINATION

Candidate's Name: Muhammad Tanveer Nasir

Registration No.: 27932

Thesis Title: A Relative Study of Dividend Payout and Life Cycle Stage of Firms

I hereby certify that the above candidate's thesis has been completed to my satisfaction and, to my belief, its standard is appropriate for submission for examination. I have also conducted a plagiarism test of this thesis using HEC prescribed software and found a similarity index at 18% that is within the permissible limit set by the HEC for the MBA thesis. I have also found the thesis in a format recognized by the Department of Management Sciences.

Supervisor's Signature: *Kaleem A. Ghias* Date: 18.01.2020

Supervisor's Name: Kaleem A. Ghias

HoD's Signature: _____ Date: _____

Declaration of Authentication

I, hereby, declare that no portion of the work referred to in this thesis has been submitted in support of any application for another degree or qualification of this university or any other institution of learning.

Student's Signature: _____

Acknowledgment

First of all thanks to **Allah Almighty** for giving me strength, guidance, knowledge, ability to comprehend and understand to complete this report.

I also admire the help of my **parents and siblings** for their guidance and supervision.

I am also thankful to **Sir Kaleem A. Ghias**, my thesis coordinator later and my teacher who gave me not only academic knowledge but also moral and social knowledge, and **Sir Mubashir Ali Khan**, who were always supportive and kind.

I am also thankful to all the faculty of **Bahria University Karachi Campus** and **Bahria College N.O.R.E I**.

Abstract

Purpose

The aim of this study is to determine that if any relationship exist between dividend payout ratio and life cycle stage of firms. The ratio of retained earnings to total shareholder's equity is used as a measure to find out the life cycle stage of firms. Other variables which effect dividend payout such as growth rate, firm size, age, retained earnings, debt/equity ratio, return on earnings, managerial efficiency are also considered. No evidence of research showing the impact of life cycle stage in Pakistan on chemical firms has been found in Pakistan.

Methodology & Design

The analysis is performed utilizing the panel data for all 32 chemical firms listed on PSX extracted from the annual publications of SBP. The time period for the selected data is 2006-2015. Regression analysis is done to determine the relationship.

Findings

The outcome of the research shows no relationship between dividend payout and life cycle stage of firms. Growth rate, debt/equity ratio and life cycle stage are found to have a negative relationship with dividend payout whereas firm size, age, retained earnings, return on equity and managerial efficiency have a positive relationship. The overall model is significant at significant level of 5 %.

Limitations

The results in this study suggest that market participants, potential investors and financial analysts should focus more on firm size, retained earnings, return on equity and managerial efficiency while making decisions related to dividends. This study has shown that life cycle stage has no impact on dividend payout, however literature implies that life cycle stage is an important factor and should therefore be considered.

Recommendations

This study recommends to all decision makers, market participants, financial analysts and potential investors to analyze the real factors determining dividend payout policy to assess firms, estimate previous and upcoming risks, schedule financing decisions which have been considered main and principal factors of dividend payout decisions. Firms' life cycle has a significant impact on dividends as discussed elsewhere in literature, though the same is not true for the firms in chemical sector of Pakistan. Therefore the impact of life cycle stage on dividend payout along with other determinants will lead investors to select an optimum portfolio with minimum risk and maximum efficiency.

Keywords

Life Cycle Stage, Dividend Payout, Relationship, Chemical Sector, Panel Data, PSX, Pakistan.

TABLE OF CONTENTS

CHAPTER 1	1
INTRODUCTION.....	1
1.1 Introduction.....	1
1.2 Background	2
1.2.1 Theories of dividend policy.....	2
1.2.2 Dividend irrelevance theory:	2
1.2.3 Bird-in-hand theory:.....	3
1.2.4 Agency cost and the free cash flow theory:.....	3
1.2.5 Signaling proposition:	3
1.2.6 Clientele effects of dividends theories:	4
1.3 Problem Statement	4
1.4 Research Objectives	4
1.5 Research Questions	4
1.6 Significance of the Study	5
1.7 Scope of the Research.....	5
1.8 Organization of the Thesis.....	6
CHAPTER 2	8
LITERATURE REVIEW	8
2.1 Literature review	8
2.2 Description of Variables.....	14
2.2.1 Dependent Variable.....	14
2.2.1.1 Dividend Payout.....	14
2.2.2 Independent Variables.....	15
2.2.2.1 Growth rate.....	15
2.2.2.2 Firm Size.....	15
2.2.2.3 Age.....	15

2.2.2.4 Retained Earnings.....15

2.2.2.5 Debt / Equity Ratio15

2.2.2.6 Return on Equity.....15

2.2.2.7 Managerial Efficiency.....15

2.2.2.8 Life Cycle Stage15
