**Bahria University Karachi Campus**

**DECLARATION OF AUTHENTICATION**

I, hereby, declare that no portion of the work referred to in this thesis has been submitted in support of any application for another degree or qualification of this university or any other institution of learning.

Student's Signature: 

## **DEDICATION**

I would like to dedicate my thesis project to my Parents as I am able to do this with their continuous support, I also dedicate this dissertation to my many friends who have supported me throughout the process. I would also like to dedicate this to my teachers who have always helped me during me time at Bahria University. I also dedicate this dissertation to my many friends who have supported me throughout the process.

## **ACKNOWLEDGEMENT**

First of all I would like to praise and thank Almighty Allah for giving me power, strength, vision and determination with the help of which I was able to complete my work in time. I would like to thank my supervisor and Bahria University for help and support, I would like to take this moment and express my deepest gratitude to my parents, family and friends who have been a constant source of motivation for me throughout this whole process without them it would not be possible. Special thanks to the Staff and customers of Islamic banks for giving their precious time and information.

## ABSTRACT

**Purpose:** this research is carried out to examine, the effects of ERP on supply chain performance of Youngs Food Pakistan. ERP is a technology led software that enables automation, streamlines processes and hence, improves performance.

**Methodology & Design:** The study was carried out using quantitative research methodology in order to examine the impact of ERP implementation on supply chain performance. The research variables identified during analysis of the literature includes: Process automation, lead time, reducing cost and managing deliveries) Studies have identified that, ERP influences all these variables with reference to the firm performance. The data on the above research variables is collected using primary data collection method i.e. through survey questionnaires. For the purpose of analysis, the researcher uses Regression test which aids in determining the impact.

**Findings** The findings from the tests shows that, 71.6% of the total impact in supply chain performance is due to ERP implementation (Process automation, lead time, reducing cost and managing deliveries) at Youngs Food. It is important to note that, previously the Youngs food maintains their records manually and after seeking export orders for Honey and Mayonnaise they tend to implement ERP for managing inventory, cost and improving deliveries. Furthermore, the Regression test also identifies that, among all the research variables, process automation and reducing cost has the higher impact having higher beta i.e. 0.36 and 0.30 respectively.

**Keywords:** *ERP, Supply Chain Performance, Process automation, lead time, reducing cost and managing deliveries*

**TABLE OF CONTENTS**

Declaration of Authentication..... ii

Turnitin Similarity Report..... iii

Dedication .....v

Acknowledgement ..... vi

Abstract ..... vii

CHAPTER 1 ..... 1

INTRODUCTION ..... 1

    1.1 Background of Study..... 1

    1.2 Problem Statement .....4

    1.3 Research Objectives .....4

    1.4 Scope of Study.....4

    1.5 Research Questions .....5

    1.6 Organization of the Thesis .....5

CHAPTER 2 .....7

LITERATURE REVIEW .....7

    2.1 Enterprise Resource Planning .....7

    2.2 Features of ERP ..... 10

    2.3 Advantages of ERP Implementations..... 11

    2.4 Modules in ERP..... 14

        2.4.1 Financial control ..... 14

        2.4.2 Inventory control..... 14

        2.4.3 Sales control..... 15

        2.4.4 Client management ..... 15

        2.4.5 Reporting..... 15

    2.5 Relationship between ERP & Customer Experience Management..... 16

    2.6 Relationship between ERP & Supply Chain Management ..... 17

        2.6.1 Process Automation ..... 21

2.6.2 Lead Time ..... 22

2.7 Need for ERP.....24

2.8 Research Hypotheses.....25

2.9 Conceptual Framework .....25

CHAPTER 3 .....26

Research Methodology .....26

3.1 Research Methodology.....26

3.2 Research Design .....26

3.3 Research Approach.....27

3.4 Data Collection Methodology .....27

3.5 Research Instrument .....27

3.6 Population of Study .....28

3.7 Sample Size .....28

3.8 Data Analysis Technique.....28

3.9 Research Variables .....29

CHAPTER 4 .....30

Results.....30

4.1 Respondent Profile .....30

4.1.1 Respondents Age ..... 31

4.1.2 Respondents Area of Working..... 32

4.2 Cronbach Alpha Testing.....33

4.3 Regression Testing .....34

4.4 Hypothesis Testing .....35

CHAPTER 5 .....37

Discussion .....37

5.1 Discussion .....37

5.2 Hypothesis 01: Process Automation.....37

5.3 Hypothesis 02: Reducing Lead Time .....38

5.4 Hypothesis 03: Reducing Cost .....38

5.5 Hypothesis 04: Improved Deliveries .....39

CHAPTER 6 .....40

Recommendations and Conclusion.....40

    6.1 Conclusion.....40

    6.2 Recommendations .....41

    6.3 Suggestions of Future Research .....41
