Abstract

Now a days the way of life of individual is busy. Individuals feel awkward and tedious for going swarmed markets. E-shopping is an aid as it saves parcel of time. Internet shopping is an interaction whereby purchasers directly purchase goods of their need over the internet. An online shopping is a framework that allows a client to submit online orders for grocery. Online grocery app is very helpful for the customer as well as the shopkeeper. This application will help the customer to buy the product by just sitting at home. This will also help the shopkeeper to increase their sales. This will also help the business individuals to grow their business. The concept was mainly to bring all necessities of life at on click. This pandemic has shutdown many businesses at the same time it has provided ease for many new businesses to grow. Keeping in mind we have developed a user-friendly application for shopkeepers and customer. This application is not only for business purpose, but also the need of this modern digital world. It will maintain trust and reliability with its users either shopkeeper or user. Customers can search for products, apply price range, check product description and place order.

Acknowledgments

In the name of Allah, the Most Gracious and the Most Merciful. Alhamdulillah, all commendations to Allah for the qualities and His approval in finishing this undertaking. We might want to offer our most profound thanks to our supervisor Sir Talha Naqash for supervising us. We are humbly thankful to our supervisor Sir Talha Naqash who made his efforts with us in making this application throughout the final year. He puts his additional knowledge and efforts for our help and was always there for our guidance.
