ACKNOWLEDGEMENTS

All praises and acclamations are for **Almighty ALLAH**, the merciful, the benevolent, the only creator of the Universe Who bestowed mankind knowledge, wisdom and potential to unravel its secrets. After Almighty Allah, praises to **Last messenger of Allah, Prophet Muhammad (Peace be upon him)**, who is the succorer of humanity, gem of mankind and the ruby of the universe.

First of all, I would like to express profound gratitude to my honorable supervisor, **Dr. Khalid Sohail**, for accepting me as a graduate student and giving me a wonderful opportunity to seek knowledge from him. I felt extremely fortunate to have him as my supervisor. Without his valuable suggestions, excellent guidance, exceptional efforts, remarkable insight and dynamic supervision, this project would not have been completed. The professional research skills that I learnt from him are invaluable for future endeavors. He always responded my queries and questions with great enthusiasm. His guidance and support have always been a source of encouragement for me throughout my stay at the Bahria University Islamabad (BUIC).

I express my heartiest gratitude and deep sense of honor to my affectionate, Father **Abdul Rauf and Mother Nasreen Begum** for their kind behavior and valuable guidance during my studies. Last but not the least; I convey my special thanks to brothers, paternal uncles and all those who pray for my brilliant future. Without their support, encouragement, and prayers, it was impossible to achieve what I did till date.

DEDICATION

To my beloved father and mother

ABSTRACT

For economic segment, commercial banks are crucial, especially in emerging countries in which financial markets aren't very well evolved and powerful. Conventional banking financial performance is critical meanwhile worthiness regarding sector stands strongly related with economy's worthiness, as a whole. Study has researched profitability factors regarding the conventional banks functioning in developing countries of Asia, by specific emphasis on position towards quality of asset. That aspect became especially significant after the introduction of tighter banking regulatory standards. Study has involved both factors of financial performance; micro and macro level. Over the duration 2013-2018, the research has used a fixed effect or random estimation based on Houseman results for the balanced test panel data containing 383 commercial banks from 25 Asian countries. Furthermore, study has assessed profitability factors of developing-country's commercial banks, through the sub division of Asia into different 4 regions namely; Western Asia, Southern Asia, South Eastern Asia, and Central Eastern Asia, which has provide with an in-depth look into the factors influencing banks' performance. Results related to ROAA, a proxy of profitability, showed a significant impact of poor asset quality, capital adequacy ratio, inefficiency, and consumer price index. While, Results related to ROAE, a proxy of profitability, showed a significant impact of poor asset quality, capital adequacy, liquidity ratio, inefficiency ratio, and consumer price index. GDP growth rate and Interest spread insignificant effect on profitability. Income Diversification showed mixed results with profitability.

Keywords Non-performing loans, developing countries of Asia, profitability of Banks, Quality of asset, Panel data, micro and macro level factors of profitability.
