Abstract

Binge watching has been positioned overwhelmingly as an addiction in academic literature. However, most recent studies suggest that it is not addictive for all audiences. This research caters to the gap of empirical research which investigates the underlying individual characteristics that contribute to problematic binge watching. Building on existing Uses and Gratification and Uses and Dependency framework this study investigated a sample of n=297 in Pakistani context to find out which audience with respect to their motivations, demographics and binge watching platforms are more susceptible to developing problematic behaviours than others.

A Pearson's correlation analysis revealed that binge watchers with coping and escapism motivation showed the greatest tendency to exhibit problematic symptoms. By conducting a One Way-ANOVA and T-Test respectively it was found that binge watchers from 18-22 years and female categories exhibited the most problematic symptoms. However, binge watching platforms did not appear to have an effect on the occurrence of problematic symptoms.

It is recommended that binge watching platforms introduce disclaimers for vulnerable audience to keep their binge watching habits in check so the prevalence of problematic behaviours may be avoided. Future research can now go beyond the addiction perspective and investigate other cultural, technological and behavioural aspects of binge watching.

Table of Contents

Chapter 1: Introduction	1
1.1 Background of the Binge Watching Phenomenon	1
1.2 Global and Local Landscape	3
1.3 Rationale of the Study	5
1.4 Problem Statement	6
1.5 Significance of the Study	7
1.6 Objectives of the Study	8
Chapter 2: Literature Review.....	10
2.1 Defining Binge Watching.....	10
2.2 Cultural and Technological Adoption of Binge Watching.....	12
2.3 Binge Watching as an Addiction.....	15
2.3.1 Maladaptive coping mechanism	16
2.3.2 Guilt and anxiety	16
2.3.3 Ambivalence.....	17
2.3.4 Use of terminology by consumers	17
2.3.5 Physical and psychological effects	18
2.3.6 Theory of rational addiction	18
2.3.7 Peer pressure	19
2.4 Moving Further from the Addiction Label.....	20
2.5 Problematic Binge Watching	24
Chapter 3: Theoretical and Conceptual Framework	28
3.1 Uses and Gratifications Theory.....	28
3.2 Binge Watching Motivations	28
3.3 Outcomes, Unintended Consequences and Problematic Behaviours.....	30
3.4 Conceptualization of Binge Watching Motivations and Problematic Symptoms.....	33
3.6 Research Questions	35
3.5 Hypothesis	36
Chapter 4: Research Methodology.....	37
4.1 Research Design	37
4.2 Sampling.....	37

4.3 Pilot Study	38
4.4 Variables.....	38
4.5 Operational Definitions	39
Chapter 5: Results and Data Analysis	41
Chapter 6: Discussion and Conclusions.....	51
6.1 Conclusions	55
6.2 Limitations	56
6.3 Future Recommendations.....	57
References	58
Annex A.....	x
Annex B.....	xxiv
Plagiarism Report.....	xxv
