## **ACKNOWLEDEMENT**

From the deepest of my heart, I would like to thank Almighty ALLAH for the unconditional love He has shown me throughout my life and strength He has provided me to cope with any challenges that came across in my life. I would like to thank and appreciate the effort of my supervisor Mr. Salman Ali Khan who has shown his devotional commitment towards the accomplishment of this dissertation. His professional guidance, overwhelming attitude and irresistible support has made this dissertation a possibility within limited span of time allowed. I would like to thank my family, as I am very grateful for their love and support through every thick and thin phase of my life. My family has been the prime reason behind the success and achievements that I have in my master's degree. I owe a great debt of gratitude to my parents for their continuous support and for being my motivation throughout my life. I would like to appreciate the supporting effort of my graduate friends who has helped me a lot throughout my graduate degree.

## ABSTRACT

This study is focused mainly on identifying the impact of warehouse management, procurement, and logistics on agricultural industry of Pakistan. This study has considered warehouse management, procurement, and logistics, as independent variables, whereas organizational performance is considered as the dependent variable in this study. However, this study has finalized agricultural industry of Pakistan to testify the relationship between variables mentioned above. The major emphasis in this study has been on exploring the relationship between warehouse management, procurement, and logistics (independent variables) and organizational performance (dependent variable) in agricultural industry of Pakistan. To prove this relationship, a survey has been conducted through a structured questionnaire regarding this literature, in which members associated with supply chains functioning within agricultural industry of Pakistan, have been requested to share their experiences by filling the questionnaires. Then, to identify the results on data gathered from the respondents, statistical instruments have been used. Some of the statistical instruments used in this study includes descriptive frequencies, reliability, correlation, regression, etc. Results derived through statistical instruments have shown that there exists a significant relationship between warehouse management, procurement, and logistics (independent variables) and organizational performance (dependent variable) in agricultural industry of Pakistan.
