ACKNOWLEDGMENTS

First and foremost, praises and thanks to the Allah, the Almighty, for His showers of blessings throughout my thesis research work to complete the thesis successfully. I would like to express my deep and sincere gratitude to my thesis supervisor, Sir Saqib Mushtaq, Lecturer at Bahria University, Islamabad, for giving me the opportunity to do thesis and providing invaluable guidance throughout this thesis. His dynamism, vision, sincerity and motivation have deeply inspired me. He has taught me the methodology to carry out the thesis and to present the thesis works as clearly as possible. It was a great privilege and honor to work and study under his guidance. I am extremely grateful for what he has offered me. I would also like to thank him for his friendship, empathy, and great sense of humor. I am extremely grateful to my parents for their love, prayers, caring and sacrifices for educating and preparing me for my future Also I express my thanks to my sisters, brother for their support and valuable prayers.

ABSTRACT

The main focus and aim of the research study were to determine the role of 3rd party Logistics (Warehousing, Transportation, and Inventory) on the supply chain productivity of SMEs of Pakistan organizations at twin cities Islamabad & Rawalpindi. This search has taken 3rd party Logistics (Warehousing, Transportation & Inventory) as an independent variable, and supply chain productivity as a dependent variable. This search study so that testify their connection in third-party logistics providers of twin cities of Pakistan. A structured Likert scale survey questionnaire was created as research instruments manage by the search scholars in this research for the collection of information and data from 3rd party logistics providers. The scholar picks the sample size of 250 respondents of 3rd party logistics providers to show the whole population. The Likert questionnaires were disturbed by third-party logistics providers by the researcher to collect the information and data. The gathered statistics was then examined through numerical tools such as regression and correlation by using Statistical Package for Social Sciences Software (SPSS). Based on results, it has been concluded that there is a positive relationship between of 3rd party Logistics (Warehousing, Transportation, and Inventory) and Supply Chain Productivity (in the third-party logistics providers of twin cities of Pakistan).

Key Words: Logistics, Inventory, Warehouse, Supply Chain Productivity
