### **Dedication**

I dedicate my dissertation work to my family and my friend. I have a special feeling of gratitude and appreciation for my parents, Rubina and Muhammad Afzaal Alam (late) who always supported and encouraged me. Their constant guidance and love has brought me to where I am today. My brother Muhammad Shahzaib Alam has never left my side and is very dear to me.

I also dedicate this dissertation to my best friend Hina who have always supported me throughout the course of this study.

## **Acknowledgement**

**“In the name of ALLAH, who is the most beneficent and merciful”**

First and foremost, I would like to thank Allah Subhanahu Wa Ta’ala for blessing me with enough resources and strength to complete my research work in the given time frame, without him and his blessings, this would not have been possible.

I would like to personally and humbly thank Mr. Khurram Adeel Shaikh, my thesis supervisor for helping, supporting and guiding me throughout this research work. I have learned many things under his supervision. I would like to thank Bahria University to provide me with the platform to conduct my research project.

Furthermore, I am very much thankful to my family especially my parents for their constant emotional and financial support, without their support my journey would not be completed.

Last, I would like to thank all the participants of my study for their precious time and feedback, without their help my research would not come to a favorable conclusion.

Nimrah.

## **Abstract**

### **Purpose**

Today consumers are increasingly relying on the online reviews when deciding to make a purchase but the credibility of the reviews are also a question mark. The purpose the study is to examine the antecedents of online review credibility while review credibility is a mediator and then its impact on consumer purchase intention and to provide empirical evidence in this area.

### **Methodology & Design**

The study focuses to collect data from the people who are the members of Facebook group named The SWOT's Guide to Karachi's Restaurants, Cafes, Dhabas, HBFE & Takeouts. Convenience sampling technique is used for this study and Google docs' questionnaires were circulated to collect data, 230 respondents participated in the research but only 162 were the members of The SWOT's Guide to Karachi's Restaurants, Cafes, Dhabas, HBFE & Takeouts group.

### **Findings**

The findings of the study indicates that antecedents which are established on the basis of the quality of argument like accuracy and timeliness along with the peripheral cues including Review consistency and Website Reputation shows a significant impact on credibility of a review and then further influencing the consumer purchase intention while Product/ Service rating shows a significant impact direct on the purchase intention.

### **Limitations**

As we know there is always a room for improvement, in this study the limitation was that the data was only collected from a Facebook group named The SWOT's Guide to Karachi's Restaurants, Cafes, Dhabas, HBFE & Takeouts. The application of this research would be

limited. The other constraint was time, as it was limited so some of the areas of the research are left unexamined.

### **Recommendations**

To broaden the implication of research findings future researches should collect data from the respondents of different online review platforms and from a larger group of people so the empirical findings will have a larger and comprehensive implications.

### **Keywords**

Online reviews, Review credibility, Purchase intention, Peripheral cues, Argument quality
