Management Studies

ACKNOWLEDGMENTS

First of all, we would like to thank Almighty Allah for giving us the resolve and determination to complete this report. We offer our gratitude to **Holy Prophet (Peace Be upon Him)** who preached us to seek knowledge for the betterment of humanity. We would like to give due credit to our teacher **Mr. IMRAN SHAUQAT** who guided and mentored us throughout the supervision and support he provided really helped the progress and smoothness of our work.

We are indeed grateful to **Mr. IMRAN SHAUQAT** our honorable supervisor, Professor, Department of Management sciences, Faculty of management sciences, Bahria University, for his kind supervision, support, valuable advice, extensive discussions, and continued encouragement.

I want to sincerely thank my supervisor, for his excitement, patience, insightful remarks, valuable information, wise counsel, and never-ending suggestions, all of which have been of great assistance to me during the course of my research and writing for my thesis. His vast knowledge, extensive experience, and professional competence in Data Quality Control have made it possible for me to effectively finish my project.

It would not have been able to complete this job without his assistance and direction.

Abstract:

The main aim of this study is to examine the origins and potential outcomes of the US-China trade conflict. This study highlights a few factors that the US had in mind when it entered into the biggest trade dispute in history: a) reducing the deficit in bilateral trade and creating more jobs; b) limiting access for Chinese firms; c) preventing China's military from strengthening; and d) reducing the federal budget deficit. It is established and proven that trade conflicts result in no winners. Given the GDP sizes and export rates of the two nations, the US-China trade war will occur as global output and commerce are both slowing. Based on the scenario technique, the study analyses the results of the trade conflict. The protectionist approach used by the US includes a political component. To evaluate the effects of the trade war on the US, China, and other nations, economists have employed a variety of data and methodologies.

China has to accelerate economic reforms in order to address trade imbalances, put an end to the war, and prevent further conflict.

Chapter#01

Introduction:

In this research study, the trade war between the China and US define. In past, there is fundamental trade policies defined that directly impact the entire performance of the businesses. These activities of the war are reliable that boost the authentic processes and build sustainable options (Wood, 2021). The government of China has developed different policies which are unethical and not reliable for the entire success of the organization. To overcome the broad activities and rebuild the trading terms, the government of the countries uses advanced processes (Amit, 2021). The US-China trade war not only impacts the economic situation of the countries but also affects the overall performance of the organization. To enhance the key processes and manage the different goals, the business plays an important role. China has developed different unfair policies which are not applicable for the future success of companies that import as well as export the entire process (Wang, 2021).

All the policies of the US-China trade war are unfair as well as unbalanced which impact the overall performance of the business and rebuilds the strategic growth. The political, economic, and different other key points were directly impacted by the trading associations (Shi, 2021). The country of China is a technological and advanced country that develop advanced and sustainable tools. It is the entire goal that rebuilds the strategic impact and analyzes the forces that affect the trade. Different factors affect the key policies of trade (Cui, 2021). These policies and procedures directly analyze the various goals that are applicable in the future.

To generate success and boost the overall commitment, the government of China and the US have developed different policies (Amaliah, 2021). All the key policies made by the government of these countries directly refer to the trading as the import and export products. Different political and environmental factors are required that also help to gain higher success and build better commitment. The China and US both are different areas that have separate rules and regulations

made by the government of the country (Jin, 2022). To analyze the overall behavior and rebuild the strategic choices, the government of both countries should deal with the advanced processes. There is a strong and effective process is required that motivates the firm to make the best decisions and follow the key rules of the trading policies.

After the trade war, different areas that are affected or impacted. So, businesses must deal with reliable and authentic tools (Liu, 2021). The development of unfair policies is one of the best and most important tools that directly impact the key performance of the businesses in these areas. Different factors impact the progress of key areas which apply to the growing tools. In the 21st century, globalization also impacts the key policies of trade that impacts the entire tools as well as techniques (Mohammad, 2021). From the Columbia, there is a new study business exists that deals with the authentic points.

1.1 Background:

In past, there were limited areas required that enforce the trading practices as well as principles. Trade between the China and US is the most important tool that directly impacts the performance of countries and increases future goals (Bown, 2021). Different reasons that impact the trade between the China and US. The firms need to rebuild as well as investigate the key points of trade that are applicable in the future. Trade is not only a key phenomenon that boosted the entire success but it also impacts the overall progress. The political and economic factors are two different phenomena that directly investigate the broad areas which are applicable for broad success (Kim, 2021). There is a new study explored by Columbia that directly imports the performances and the signs of progress of the trade war. China and US both are key areas that are directly applicable related to the broad and entire terms. Various reasons appear that directly impact the overall growth and the key trade policies among the countries (Wood, 2021).

China and US both are countries whose direction contributes to increasing the economy at the global level. For trading among both countries, the management of the firms deals with sustainable actions. In past, different activities and the key options directly impact the trading between the US and China. Both are key countries or areas which are effective for the cleared success (Patrick, 2021). There is a new study that appears from the entire structure that directly investigates as well as contributes to the success of the organization. When the internal and external processes are applicable then it deals with the development of advanced tools (Nong, 2021). There is a strong

and effective process is required that improve the trading between the US as well as China. These countries are applicable in terms to build better and more authentic variables.

This war is developing due to the changes in culture as well as the broad tools of the nations. The lack of trading functions is also important that affects the overall performance of the building areas. It is the reflective and unique value that exists that boosts higher success and manages the fundamental options. The trade war between the China and US defines that various lacking areas are the main causes of the war (Gokan, 2021). It is an important and reliable process that directly affects the overall growth of businesses and the broad areas which are important for future roles. In this modern world, different factors exist that define the trade war causes between the China and US.

One of the major areas is the lack of effective and efficient policies which are applicable to deal with greater success (Richard, 2021). For developing better success and building reliable opportunities, the entire management of the business directly investigates the overall flow. It is a reliable and accurate process that deals with sustainable and authentic decisions. The trade war affects the entire performance of countries and their future opportunities that impact the overall growth (Park, 2021).

1.2 Problem statement:

In the past, the government of China has developed some unfair and unbalanced policies that directly impact the overall performance of the country and its economic situation. It was a critical and difficult situation that directly affect the entire performance of the firm. To rebuild the strategic choices and communicate with the advanced areas, the trade war must be resolved (Choi, 2022). Due to the unfair policies of China's government, the economy of the country becomes decreased. It was the cleared and reflective area that boost the better functions. The China and US both are impacted by the development of unfair policies and rules. There are strong and effective strategies are required that help businesses trade their import and export (Ray, 2021). China and US both countries have developed different areas which are important to investigate the mission and rebuild the strategic choices.

The current dispute regarding trade between the China and US directly refers the sustainable functions. It is the broad areas that are important for greater success and managing authentic decisions. What elements and strategies are required that directly impact the overall performance

of the business? The China and US trade war is applicable which deals with the sustainable environment and rebuilding the advanced processes (Sykes, 2021). To overcome the challenges and improve the better growth, the management directly deals with the sustainable areas. All the activities and the actions that are important for better and reliable growth help to analyze the trade war.

1.3 Research questions:

- What are the reasons for the China and US trade war?
- What factors are required that impact the economy of the country?
- What forces and policies of China that are main causes of war?
- To analyze the factors that directly affect the economic policies of the country?

1.4 Objectives:

- To investigate the reasons for the China and US trade war (Yuksel, 2021).
- To evaluate the bad policies of China that will adopt the entire structure and the better phenomenon of the international market.
- To determine the forces which are the main contributors in the key trades of China and the US (Huang, 2021).
- To understand the role of entire forces and factors that impact the performance of the organization.

All of these objectives are important that help to gain the business better success and boost the entire processes that deal with the greater tools. All the activities that help to gain success directly recommend the entire values and improve the future processes. It is a very important and reflective part that helps to gain authentic decisions (Dincer, 2021). To enhance the overall performance and manage the better growth, it is necessary to resolve the challenges which are applicable for better growth. All the activities and actions that are important for the broad areas are very effective. There is a strong and fundamental principle is required that deals with the broad and cleared areas. All the forces of the firms are relevant and deal with sustainable goals (Ding, 2022). The China and US trade war is an authentic and reflective process that builds clear goals.

1.5 Scope and limitations of the study:

The scope of the project is to analyze the forces as well as factors that impact the US and China trade war. It is a clear tool that is applicable and impacts better and reflective growths. Different factors are required that help to gain a competitive advantage and manage the different processes (Lee, 2021). The scope of this project is to analyze the reasons as well as the lack of economic policies which are important for greater success. The war between China and US is applicable that impact the overall tools and techniques. Different functions that performed by the firms and build the sustainable areas to resolve these practices (Kaushalaya, 2022).

It is the necessary part for better success that leads to the entire and reflective areas. Different limitations that we faced through conducting the study. In which the lack of data collection, the insufficient sampling strategy, and the broad areas that are not reformed (Ganda, 2021). The scope of the research directly realizes the broad and authentic decisions which are vital areas. Different functions have required that deal with the broad and clear success that resolving the forces of the US-China trade war.

1.6 Justification:

This research is very beneficial and effective and helps to gain success and improve the entire commitment related to the cleared areas. It is the process that deals with the entire sustainable and better tools which are applicable for future success (Mau, 2021). The development of the organization is very important that helps to gain a better share of the market. The trade war among the countries appears due to the different key points. In which the economic forces, political factors, and other basic terms (Cuya, 2021). All the actions and activities that are associated with the broad areas directly refer to the sustainable and authentic tools.

This research project is very beneficial that directly impacts the broad areas and the entire trading resources. It is the research and key era that investigate the overall processes regarding better growth and reflective options (Udayashani, 2021). All the processes and functions which are important for the entire success lead to the instant areas. To investigate the broad areas and key reasons that are important for the entire growth of success, the management directly prefers reliable and fundamental tools (Lucey, 2021).

All the activities and the actions that are associated with better growth lead to the entire tools. The management of the firm and the broad areas that are applicable help to gain the better and broad

areas. It is the research project that plays an important and reflective tool that deals with better and more reliable success. It is the most important and reliable area that builds sustainable and fundamental options (Shen, 2021). Different functions and forces are required that directly affect the overall growth and rebuild the advanced areas. The trade war is consisting of different areas which are important and better for broad success. To generate the greater tools and techniques, the management deal with the reflective options. This war represents the political as well as the economic situation of the country by defining the different points (Kim, 2021). China and US both countries have developed different policies which apply to the trading terms.

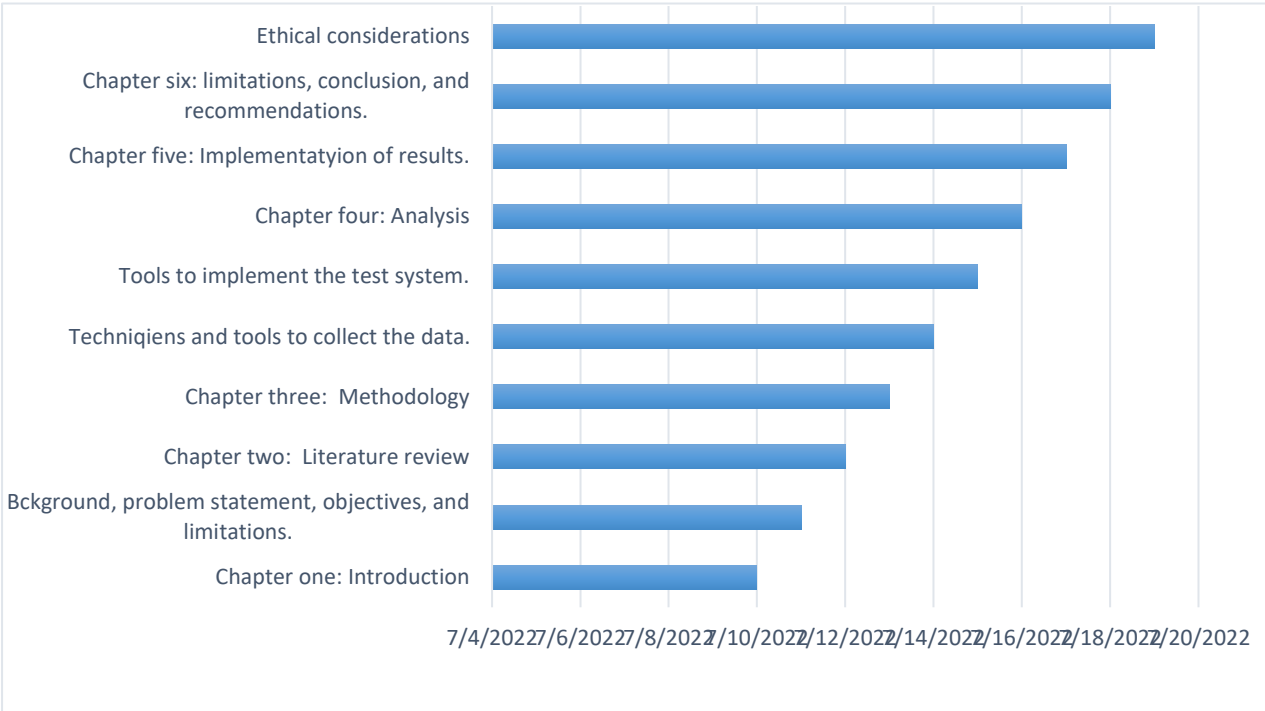

1.7 Budget and resources:

Different resources are required to run the operations as well as the broad areas of the research. To determine the goals and build effective strategies, the research study has developed different principles (Sheng, 2021). The human resource, financial resources, and different other resources that are applicable for success are important. There are strong and fundamental options are required that investigate the different and important roles of the research.

This research study is the authentic tool that defines the reasons and factors for increasing the entire performance of research. The development of strong research is important that deals with broad and authentic decisions. To increase the environment and generate higher profitability, the management deals with sustainable options (Omond, 2021). Human resources, financial, and economic resources are some important resources for the betterment of the research.

1.8 Project schedule:

The project path defines the activities as well as the broad tasks that are applicable for the entire success of the organization. The Gantt chart and the work breakdown structure of the project clearly show the schedule that admires the activities with the duration of work (Yeung, 2022). The schedule of the project defines what areas and the broad processes are required that directly investigate the overall flow of the operations. To enhance the strategic growth that rebuilds the sustainable goals and manages the referral areas, the development of the success is important (Amaliah, 2021). All the activities and actions that are applicable for better growth rely upon fundamental principles. Different factors have required that deal with the better sustainability and boost the entire growth of the business.

Chapter#02

Literature review:

In this chapter, the key variables of the research study and their relationship to gaining better success are defined. The organization needs to deal with the reflective and entire process that deals with the advanced tools of the business. The US trade war has a greater impact on the political as well as the economic situation of the countries (Amaliah, 2021). Different activities are required that help the government of the China and US related to the better and more reflective areas. To express the different goals and objectives, the management expresses its mission regarding the broad areas. The US and China trade war affects the entire performance of the business. Different activities are relying on that deal with the sustainable and authentic tools (Amit, 2021).

Various functions and possibilities allow the use the better processes and implementation the advanced growth (Bown, 2021). Different functions are required that help to build better options and admire the growth of the tools. All the activities of the firms are reliable sustain the better options and deal with the energetic tools. There is strong and effective communication is required that rebuild the advanced and growth tools. The US and China trade war directly impacts the overall progress of the business (Choi, 2022). Various technological and economic factors allowed that also help to increase the entire performance and rebuild the strategic growth. It is the better and more sustainable option that recommends better processes.

2.1 Reasons that affect the US and China trade war:

Different reasons that impact the US-China trade war. The change in numbers of jobs, as well as the rate of employment, are some reasons that become a cause of explicit the key resources of businesses. It is the best and most fundamental tool that relies on the betterment and sustainable options regarding the entire growth of the businesses (Cui, 2021). Various strategies are allowed that reduce the entire level of unemployment and rebuild the strategic choices. All the activities of the firm which are important and reliable directly rely on better tools. The trade war between the China and US directly prefers the reliable efficiency that leads to advanced processes. Different activities are allowed that motivate the citizens to get better jobs in the areas (Cuya, 2021). The government of China develops different opportunities for the people in which they can get better employment and lead to broad areas.

To enhance the overall performance and build better forms, the management prefers substantial growth. Different functions and processes are required that help to admire the broad and authentic areas (Dincer, 2021). The US-China trade war becomes apparent through the lack of defect in reliable and bilateral trade. It is authentic and better growth that helps or motivates the different goals. The lack of technology is another reason that develops trade restrictions and affects the entire performance of the business (Dincer, 2021). To express the overall performance and rebuild the strategic choices, the management of the firm affects the overall progress of the businesses in these areas. China is a technological country as compared to the US. The production of products and services which are applicable for the entire success is higher in China (Ding, 2022). That's why the management of the business achieves sustainable tools.

Various strategies and options have required that deal with better growth and rebuild authentic values. Different reasons that impact the trade practices of the China and US. Increasing the number of jobs, reducing the deficit of bilateral trade, and the limited access to the international market are some entire tools or reasons that become the causes of the China and US trade war (Amaliah, 2021). This trade will impact the overall performance of the business and decrease the entire strategic growth. The use of American technology is necessary because it is the scheme that motivates as well as builds the trade. For raising better success and communicate to reliable information, the management directly deals with the sustainable options. The trade war impacts the overall growth of the businesses that run their operations in these areas and implement them for future success (Amit, 2021). In this research, various risks and key points are noticed that help to analyze the entire performance of the businesses at the international level. China is a more technological country compared to the United States.

2.2 Explore the factors that directly affect the economic policies of the China and US:

Different factors directly impact the policies of the China and US regarding the trade between the two nations. Trade shows the import and export of the entire product related to the broad and reflective goals (Bown, 2021). All the activities of the research are very convenient that directly define better growth. It is the reflective and broad areas that change the better structure of the market. It is the better tools that area that relies upon the fundamental principles according to the broad areas. In all the broad areas and the authentic values, the management deals with the greater tools (Cui, 2021). For better growth and advanced practices, the management will lead to

sustainable actions. The US-China trade war affects the overall progress and the entire performance of the businesses that run their operations in the long-term processes.

Various activities are required for better success and reliable tools. Different strategies have required that impact the long-term growth and rebuild the strategic choices. The rate of unemployment is the factor or process that deals with sustainable options (Gokan, 2021). Different policies and procedures have been required that impact the overall tools and rebuild the advanced processes. Different factors are required that motivate the cleared and advanced processes related to better tools (Dincer, 2021). Various options exist that deal with the broad areas regarding the cleared tools. Various forces and factors are allowed that help to gain success and build the advanced commitment. The trade war between the US and China directly defines the overall commitment regarding future goals. Various opportunities are tackled that rebuild the strategic growth and build sustainable tools (Gokan, 2021). The trade war between the two different nations helps to investigate the overall flow regarding the better sources and the advanced areas of management.

Due to the lack of technological changes and the development of strong relationships among the better terms, the management will lead to reliable options. Various activities are allowed that motivate the organization to gain better forms and rebuild the advanced possibilities (Gokan, 2021). Different forces and factors directly help to gain success and resolve the issues that appear in the form of a trade war. The development of trade war and boost the authentic values, the management of the business leads to the admire changes. The development of job opportunities can change the entire structure of businesses and construct the overall relief of business, the management directly relies on the better areas (Amaliah, 2021).

Globalization is the process that directly contributes to increasing the performance as well as the progress of the business. There is a strong and reflective process is required that directly deals with the sustainable option (Choi, 2022). The development of functions that apply to the success of businesses associated with the economic growth of China and the US are also the main forces that become the causes of war. This war impacts the global market by hitting the needs as well as the wants of customers regarding better sustainability (Amaliah, 2021). There is a unique and perfect element that is required that motivate the advanced and better forms.

2.3 The impact of China's bad economic policies and the US-China trade war:

The government of China has developed some unfair as well as unbalanced policies regarding the success of the firm. To rebuild the strategic choices and communicate reflectively, the management deal with substantial tools (Amit, 2021). The government of China has updated its policies according to the requirements of the local market. That's why the management of business relies on observing the different elements. It is a strong and efficient process that realizes the better phenomenon. In the long-term strategic growth, the management of the business has developed a strong and reliable tool that leads to better strategic activities (Bown, 2021). It is the most vital area which improves the overall growth of the success and rebuilds the better elements. The unfair policies of China do not apply to the people as well as the businesses of the US.

That's why the global operations and the entire markets of the business are directly impacted by the key values (Choi, 2022). The unfair policies of China also act as an unbalanced which impacts the entire tools. So the management of the firm relies on the relevant forces and the greater strengths. Various options are required that deals with the better and more authentic variables. As the core capabilities, the management will lead to the advanced resources that inspired the better growth. The China-US trade war impacts the overall performance of the businesses that run their functions in the entire market (Bown, 2021). These activities directly lead to sustainable and authentic values. Various activities are important that help firms gain success and boost the required areas. It is the fundamental option that tries to sustain the better and current phenomenon.

Various activities are important that help to tackle the broad and advanced processes. The trade war directly impacts the future firms which leads the greater and better decisions (Cui, 2021). Various activities are important which directly lead to long-term success and build the greater forms. Various options and broad functions are allowed that motivate the organizations to retake the tools. The war starts from the lack of economic policies and the unfair conditions of the country made by the government (Dincer, 2021). China needs to understand the possible situation regarding the success as well as the broad functions of the global market.

Different factors are required that motivate the organizations to lead the cleared and valuable success. The political situation of the China trade war must be positive that improve certain and authentic outcomes (Ding, 2022). So, the trade can be encouraged after managing these issues. For analyzing the impact of trading war, we observe the long-term commitment and the advance

preferred areas. To develop a better and more effective thinking process, the management directly deals with the broad areas.

2.4 The role of exporting and the US-China trade war:

The US-China trade war becomes more popular in terms to gain the entire success and reflect the key policies regarding the instant actions. It is the strong and reflective process that leads to better success. The management of conflicts that appears during the trade wars also impacts the entire performance of the businesses (Ganda, 2021). It is an important and reliable tool that directly insists on the commitment and the betterment of the businesses. The China-US trade war directly impacts the growth rate that will lead to better and sustainable tools. All the activities and the actions of business that are applicable for future success, lead to internal growth possibilities (Gokan, 2021). There is a strong and mutual function allows that motivates the overall behavior of the business. To gain long-term success and generate reliable values, the management directly leads to advanced sustainability.

Different functions that are applicable for the better success of the market and resolve the key trades between the China and US. To rebuild the strategies for the firm's growth and communicate with the advanced tools, the management directly leads to better success (Huang, 2021). Various functions are applicable that investigate the internal and the external flow. It recommends the advanced and better process that admires the advanced missions of the firms. All the broad activities of the firm are applicable when the government of China develops fair policies regarding instant flow (Kim, 2021). When the internal strategic growth becomes increases then it appears substantial growth. All the activities of the business are applicable for better tools, the management directly leads to better sources.

By exporting the materials from China, the US can deal with sustainable and effective tools. To raise long-term awareness and rebuild the strategic choices, the management deal with better tools (Amaliah, 2021). When the environment of the country is effective and transparent then it defines the overall growth which is effective and important for future success. It is reliable growth that deals with better and more authentic processes. All the forces that use by the government of China to maintain their exports directly prefer the sustainable options. To protect the country from unfair policies, the entire management will lead to advanced and reliable forces (Gokan, 2021).

It is a fundamental activity that maintains the nature of the businesses regarding the use of the most authentic processes. There is a strong and vital aspect required that increases the relationship between the China and US. It is an important and reliable activity that helps an organization express the advanced mission of the business (Ganda, 2021). When the environment of the firm is reflective then it deals with the better and more effective terms. Different opportunities allow that motivate the firms to enter the international market by launching the most authentic and reliable processes of the organization (Amit, 2021). Different activities are allowed that motivate the firms to gain authentic and reliable processes.

2.5 The role of government's policies and the US-China trade war:

The government of China and the US develop the entire process for the better success of the business. All the forces are applicable with the cleared tools that make certain changes. It is the important and reliable part that directly boosts the overall progress of the business. Various technological and political options have required that deal with sustainable values (Choi, 2022). Various options and activities motivate the government of the country to express their views and develop the policies related to the entire term. The success of an organization is relevant because of that deal with broad and variant options. It is one of the best and most authentic tools related to the broad and reflective processes (Ding, 2022). The import and export of the materials are also the broad and reflective terms that define the internal ways of success.

It is the most possible solution that directly relies on certain better options and communicates with the entire tools. All the broad activities that develop by the government of China to observe the entire behavior of the people regarding the trading policies depend on the internal resources. The management of the firm relies on the fundamental options that gain the bothered areas (Cui, 2021). The government of China has also developed policies related to the export of the products to the US and other countries. This scheme of the business directly impacts the substantial tools and the preferred areas (Cuya, 2021).

Another important issue regarding the trade war between China and US is the security issue. The government of the country is responsible to develop the policies in which the protection of people, as well as their businesses, exists (Amaliah, 2021). The policies of China and the practices of the US both are different in terms of explaining the bitter success. Different functions and possibilities are required that motivate the firm to deal with the substantial areas (Cui, 2021). Due to the lack

of securities, the trade between these two countries becomes to stop. That's why there are a lot of business issues that appear that impact the entire performance and the key progress of the firm. The management of international businesses that runs their operations in the China and US is also affected very badly due to the entire and strategic tools of the business (Ding, 2022).

The business needs to gain the better and long-term forms that directly impact the better areas. All the activities of the business are required to sustain the better and fundamental options. That's why the management should use advanced and reliable tools. There is a strong and effective element is required that deals with the substantial and reflective processes (Yuksel, 2021). All the broad areas which are expecting better growth and deal with the entire terms prefer the long-term areas. To determine the goals and objectives, the management uses better techniques. Various activities have been required that deal with the greater and fundamental options. It varies to observe the internal environment and manage the obstacles (Yeung, 2022).

2.6 The Impact of US China trade war on Pakistan

The calculation of each country's coefficients to determine the change in exports from China, India, Bangladesh, and Pakistan to the US was done using the difference-in-difference approach. The empirical findings show that Pakistan's exports to the US decreased by 3% while China's exports to the US decreased by 39% as a result of the introduction of US tariffs. India and Bangladesh, on the other hand, benefited from the trade war, with an increase in exports of 39% for India and 50% for Bangladesh.

Consequently, it is possible to draw the conclusion that Pakistan's overall trade situation is negatively impacted by the US-China trade war.

Chapter#03

Methodology:

In this chapter, the method to collect the data, the approach of the research, and the tools that are used to measure the information are analyzed. This research defines the overall forces and the factors that impact the trade war between the China and US. Different reasons and the factors that directly impact the overall performance of the businesses that run their operations in the China and US (Wood, 2021). It is an important and reliable network that directly provides a detailed plan and runs the commitment. The China and US are the two different countries that directly investigate the proper plan and develop effective teams related to better success (Amaliah, 2021).

Different functions that are useful and reliable for gaining success and generating strong activities. The trade war between the US and China directly defines the overall commitment and the lack of securities. The research methodology is the chapter that defines the approaches and tools of research to analyze the relationship between the two different variables (Wood, 2021). The US-China trade war is the entire process that deals with the sustainable and reflective tools that define future goals. Various activities are required to analyze the information related to the topic of the research. The research has a benefits plan that changes the overall growth and rebuilds the sustainable forms (Bown, 2021). To increase the environment and generate strong success, the management directly leads to advanced processes. Different functions are required that motivate the entire and reflective goals.

3.1 Techniques used to collect facts and data:

In this research study, this data is collected by using the previous and existing source. This source is known as the secondary source. To enhance the overall goals and generate the entire commitment, the management deals with better sustainability. Different activities have required that deal with the better growth and boost the greater outcomes (Cuya, 2021). The secondary data is very effective for this reseal because it gives accurate reasons for the war between China and US. All the policies made by the government of China and the US were directly analyzed after using the secondary source as the data collection method. It is the strategic tool that allows the

firm to gather better and fundamental options (Cui, 2021). Various technologies are associated with better and more effective successes.

From the secondary source, the development of advanced and vital areas is important. It is one of the best and most important tools that allow the firm to get higher achievements. To express the views of people related to the trade war between the China and US, the secondary source is best. It is the reflective tool that gives reliable and accurate results according to given success (Shen, 2021). A successful organization is the sign to get the better and fundamental options. These activities are directly linked to getting the better and vital areas. Various strategies have been used that help to gather the information and communicate with the participants (Bown, 2021). The trade war is the most appropriate element that gives them better tools.

3.2 Tools used to analyze the data and the processes:

Various tools are used to collect the data and gather accurate information from the secondary source. This process leads to the advanced areas that directly sustain the long-term missions. The management of the organization and the development of a strong mission, and the entire policies are important (Amaliah, 2021). Journal articles, research papers, past academic papers, country reports, and political reports are some important tools that recommend sustainable goals. Different factors are required that motivate the researchers to analyze the data and select the appropriate one (Ding, 2022).

Different factors deal with the entire growth and update the overall communication. To explore the market and build sustainable information, the use of advanced and reliable technology is important. Various opportunities are allowed that build reliable and accurate growth that achieves sustainable terms (Cuya, 2021). Various functions and activities are allowed that collect the data and build the authentic process. The use of past academic papers and resources are used to collect the entire success. The research study refers to the broad areas which apply to the trading policies of China and the US (Ding, 2022). The political reports and the economic situation of both countries are two different tools that directly impact the overall performance of the research.

3.3 Tools used to implement and test the system:

Different tools are used to implement as well as test the system through the process of data collection. This research is based on qualitative research that collects and analyzes the data related to the use of advanced and sustainable functions (Shen, 2021). To overcome the broad activities and implement a stronger system, the management will lead to sustainable goals. Various strategies have been used that deal with the entire structure and rely on using the most authentic parts. All the broad activities of research are very beneficial that analyzing strong and impactful data (Cui, 2021). It is the process that deals with the entire tools and elaborates the fundamental options that are necessary for greater success. It is qualitative research that deals with authentic and reflective research.

To disclose the policies and measure the outer efficiencies, the management directly takes the better and fundamental goals. In this advanced world, the management of a firm directly deals with authentic and reflective positions (Wood, 2021). Various activities and possibilities have been required that deal with the better functions and elaborate the internal parts for the future success. The qualitative-based research gives better and more authentic results that motivate and inspire the research through getting the best outcomes (Amit, 2021).

This research aims to analyze the impacts of the China and US trade war. Different implications and outcomes of these policies also are analyzed in the future. Different tools and strategies are used to collect the data related to the research variables (Amit, 2021). These tools give accurate information and help to decide the impact of the US-China trade war.

3.4 Schedule and project cost:

The schedule and the cost of the project can be defined through the entire work structure. This research is consisting of different chapters and each one can be completed according to its own time. That's why the management of research is necessary that deals with reliable and authentication tasks (Choi, 2022). The scheduling of the tasks and implement it in the future help researchers to get the formal times. The purpose of this research is to analyze the impacts of the US-China trade war on the economic as well as the political situation of the country (Amaliah, 2021). It is a very reflective and authentication term that defines the straight path to the people and businesses.

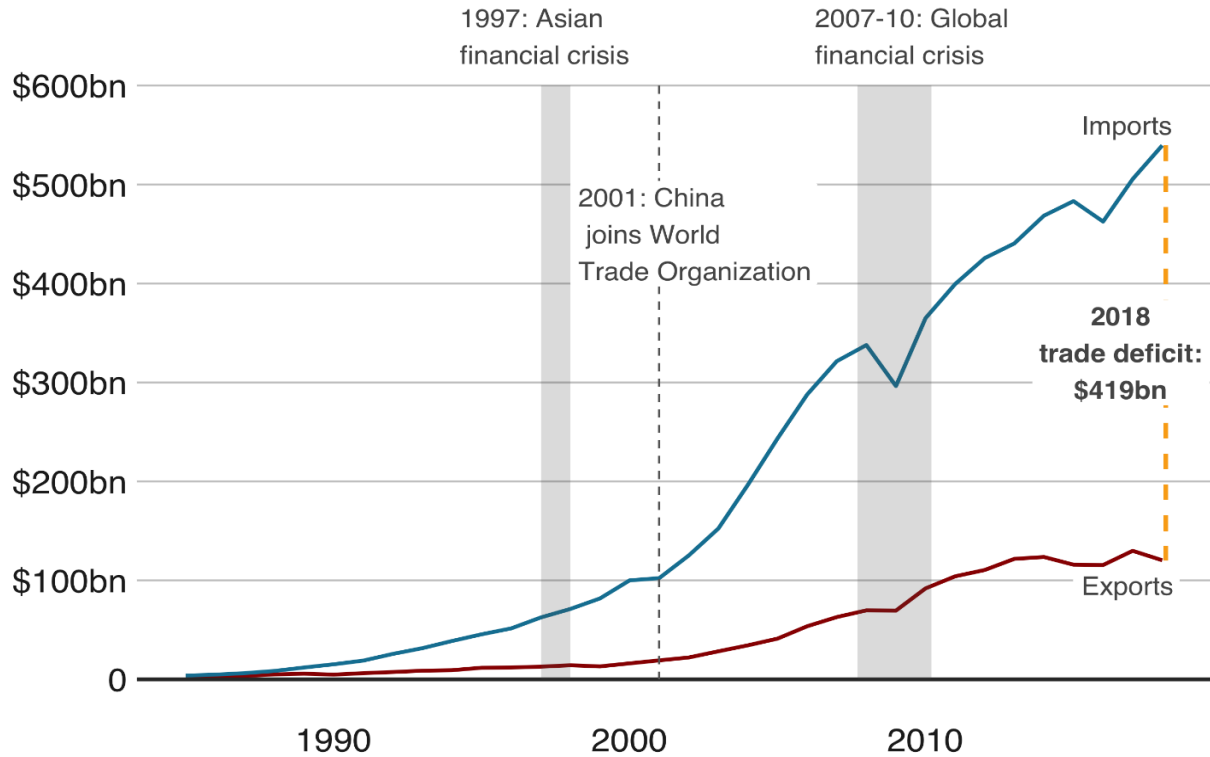

3.5 Discriptive Statistics and Results:

In this chapter, we analyze the data collected from the different tools and techniques. The data and information that we gather directly refer to the development of forces that appear during the last US-China trade war. This trade war is the most memorable and historical war that directly deals with better success (Amaliah, 2021). Different factors are existing that define the entire resources and build the sustainable options. Various processes and activities are allowed that investigate the firms to take better and more effective opportunities. The government of the US did not accept the policies and the rules made by the government of China (Cui, 2021). That's why the war has been started because the policies of trade made by China's government are unfair as well as unbalanced that don't have a proper network for the current as well as the new businesses.

Chapter#04

US trade with China

US trade deficit with China has soared since 1985

Source: US Census

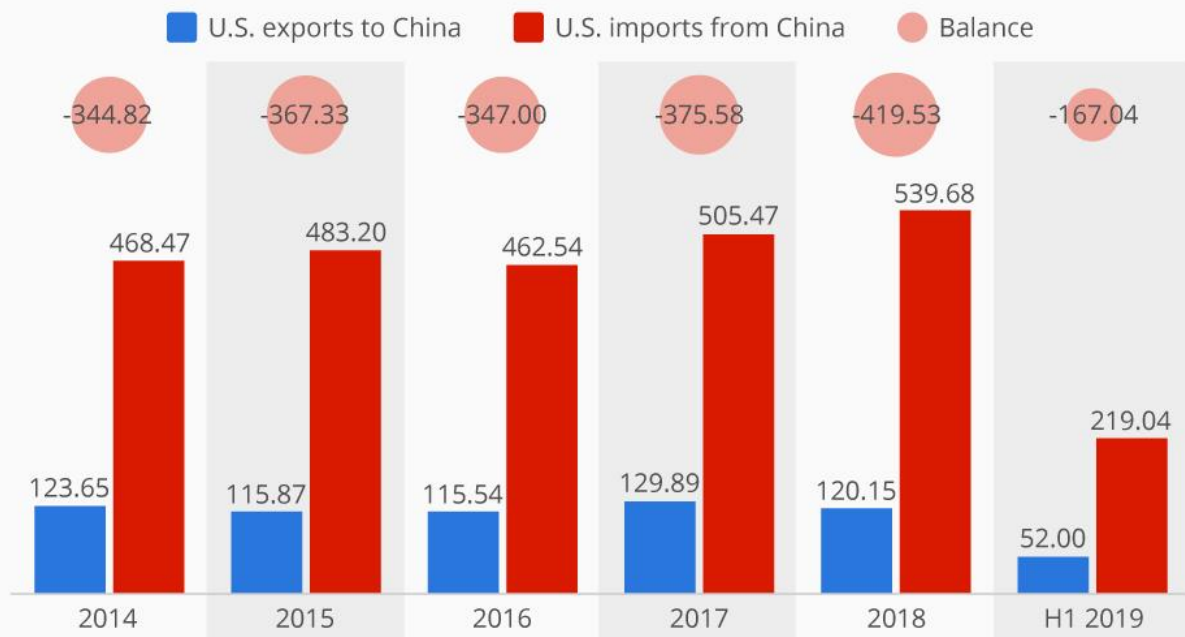

BBC

Compare that to 15 years ago, when trade with China was worth about a third of today's trade, just over \$230 billion. At the time, China was the US's top trading partner behind Canada and Mexico.

Fast forward to 2018 and the US's closest neighbors are now in 2nd and 3rd place. The U.S. trade deficit with China around \$420 billion last year, as the chart above shows is hurting America's manufacturing prowess and jobs.

The U.S.-China Trade Deficit is Growing

U.S. trade balance with China from 2014 to July 2019 (in billion U.S. dollars)

@StatistaCharts Source: United States Census Bureau

4.1 The description of how the current system works:

The research moves from the initial points to the final goals by analyzing the impacts of a trade war between the China and US. That's why the data is collected through the use of advanced and familiar options regarding the substantial areas (Cui, 2021). Different key points that we focusing on in this research are the main causes to develop the higher level of threats and impact the overall processes. Due to the lack of exporting, lack of practices, and the irregular rules and policies of China which are not acceptable in the US are some technical tools that directly impact the overall performance of the business (Ding, 2022).

To enhance the overall goals and build higher success, the management deal with the broad and authentic areas. All the forces and factors that improve the overall progress rely upon substantial forms (Sykes, 2021). There is a strong and effective process is required that helps an organization

build better forms and rebuild the strategic choices. The trade war appears due to the lack of understanding and the bad policies developed by the government of the countries.

It is very effective and efficient for the countries to develop the policies of a trade by involving both importers as well as the exporter. This technique of the organization is directly familiar with the core areas that improve substantial growth (Amaliah, 2021). To discover the businesses and update the reflective forms, the management directly deals with the broad and authentic areas. Qualitative content analysis is the method used to conduct the research and analyze the given or collected data.

4.2 How are the facts and the data gathered including the methods used?

The facts and the data gathered to deliver the entire success directly take the advanced goals. To rebuild the strategic choices and communicate with the overall growth, the management deal with the successful terms. It is qualitative research that is based on past and historical data. Different sources are used to collect the data and give a clear or straight review (Bown, 2021). The success of an organization depends on the different elements which can be acceptable and build substantial tools. All the broad activities of the firm which are applicable and acceptable in the future directly rely on enhancing the overall goals. Different factors that are associated with the entire growth help to generate better forms of action (Ding, 2022).

The data and facts that we collected, were used to analyze the current and future success. The trade war between the China and US started with the development of unfair policies by the government of the country (Gokan, 2021). Different types of threats that made by the government due to building unbalanced policies. Trading is one of the main tools and sources that directly increase the entire performance and generate higher success. That's why the management of the organization and the entire flow of the activities directly leads to substantial goals. Different areas that we focusing to determine the better and the effective goals (Gokan, 2021).

Table 1. Increase in import tariffs in 2018 and 2019 (percentage point)

	2018						2019/June		
	(importer)	USA	China	India	WHTPP	EU28	ROW	USA	China
	(exporter)	China	USA	USA	USA	USA	USA	China	USA
Agric		8.2	22.5	11.4	0.3	0.8	0.2	12.3	0.6
Mining		9.9	10.2	0	0	0.6	5.0	14.8	9.8
FoodProd		8.6	24.7	0.6	2.9	5.1	0.1	12.9	3.3
TextApparel		1.8	6.2	0	0.1	2.8	0	2.7	7.1
PetroChem		7.1	8.5	0	0.2	0.1	0.1	7.9	3.6
Metals		10.4	22.8	0	4.5	1.9	0.02	8.8	4.5
Machinery		21.2	8.0	0	0.1	0.7	0.04	8.3	6.1
ElecEquip		8.6	4.8	0	0	0	0	5.8	6.8
Auto		11.1	34.0	0.07	0	0.02	0	12.9	0.2
TransEquip		16.4	10.4	0.3	1.2	2.5	0	6.0	6.5
OthMnfct		2.1	10.8	0	0.5	2.7	0.2	3.2	4.9
ConstUtil		10.0	3.0	0	0	0	0	15.0	0
TradeTrans		0	0	0	0	0	0	0	0
Services		0	0	0	0	0	0	0	0

Different activities that are allowed to the management of businesses are acceptable and manageable in the future. Various broad terms are useful that investigate the key points as the causes of trade (Bown, 2021). Trade among the entire values and rebuilding the strategic growth relies upon sustainable actions. It is an important and efficient portal that deals with authentic values. Trade between China and US gives the clear and vital records in which the overall performance of the businesses that run their operations and gain a better understanding becomes familiar. China is a country that rebuilds its strategic growth and updating the overall abilities of the market (Dincer, 2021).

All the actions and activities which directly involve getting the advance and future sources, help to take the admire tools. All the activities of the business are reliable that directly investigate the future terms. In this advanced and modern world, the management of the firms in these areas directly refers to the better and the substantial sources (Amaliah, 2021). The project specifications and the requirements are the skilled people, better involvement of the participants, utilized the collected data to the right path, and give straightforward answers related to the trade war and its impact on globalization. The economic growth of China and the US was also affected due to the trade war between them. These forces directly impact the performance of the firms (Shen, 2021).

4.3 Implementation:

Effectiveness of the tools used for analyzing the data:

By analyzing the data, it is observed that the management directly helps to gain better success and build sustainable tools. To explore the market needs and boost the overall reflection, the involvement of countries is necessary (Gokan, 2021). Trade between the China and US is a historical trade that gives different opportunities to the businesses that can increase their higher success. All the activities and the signs of progress, directly make the strong and authentic variables. To explore the market and boost reflective growth, the management directly prefers the better areas (Bown, 2021).

Table 2. Increase in US import tariffs on metals (percentage point)

	Metals
Japan	9.4
China	10.4
HongKong	0
Korea	0.2
Taiwan	6.6
Singapore	0
Indonesia	0
Philippines	0
Malaysia	0
Thailand	4.0
VietNam	7.4
RoASEAN	0
Australia	0
NewZealand	0
India	9.2

To overcome the progress and retake the entire commitment, the management directly prefers the sustainable areas. When the current options and the abilities are required then it gathers the admired terms (Choi, 2022). Different reasons exist that directly affect the overall performance of the trading among the different countries. Various opportunities are relying on that build the better and more authentic goals.

The development of effective tools is important that build advanced and reliable growth. Different tools and techniques are required that help to increase the internal as well as the external abilities (Ding, 2022). The management of a firm refers to the entire growth that achieves clear forms. All the activities that are performed by the firms rely on to gain higher success and build trading opportunities. The trade between the China and US shows that the involvement of key practices is strong.

4.4 Proposed changes, recommendations, for implementation of proposed model, technique, or results:

Different activities are required that help to boost the overall performance and take better forms. Various technological forces are required that support the research to analyze the overall process of investigation. The trade war starts from the development of unfair as well as unbalanced policies that are effective for the entire future (Dincer, 2021). To determine the goals and build better tools, the management deals with better sustainability. A sustainable tool is required that investigates the firm to proceed the better growth and reconstruct the better goods. All the activities of the organization are satisfied that deal with the reliable and advanced growth. The China and US are the trading countries that focus on the development of higher production (Amaliah, 2021).

Various goals are required that deals with the substantial and reflective process. There are long-term and profitable businesses exist that directly investigate the entire success (Gokan, 2021). When the environment of the firms in these trading countries is reflective then it boosts the overall areas. After analyzing the outcomes, we observe that the development of fair and balanced policies is important that improve the entire values of the firm. To generate success and analyze the impacts of trading wars, different areas or points can be focused on (Cui, 2021). For observing the outcomes and constructing the long-term relationship, the management directly prefers the substantial tools.

Table 3. Impact on Sectoral imports in the USA and China, 2035 (percent changes relative to the baseline)

	USA			CHN		
	S1	S2	S3	S1	S2	S3

Chapter#05

Recommendations/Conclusion:

In this chapter, the limitations, conclusion, and the recommends regarding the analysis of the impacts of the US and China trade war define.

Limitations:

Different limitations that we observed through this research study. These limitations will help to gather reflective and authentic data. Different challenges faced by the researchers deal with advanced and sustainable growth (Bown, 2021). Different factors are required that investigate the entire forms and build better growth.

- The issues related to the selection of the data and the size of the sample is existing in this research. Different types of data have been collected that impact the entire performance of research and give reliable information. Due to the insufficient size of the sample, the entire value becomes tackles.
- The insufficient sample size for the measurement of statistics and the lack of previous research studies on the topic (Udayashani, 2021). To enhance the overall growth and update the reflective process, the development of the research studies is important.
- Complement and refine tests are some important tools that deal with the better and more authentic areas.
- Understanding for placing the research, validation for the scientific research, and the level of published research are some important values that build sustainable goals (Dincer, 2021).

Conclusion:

In this research study, the trade war between the US and China is defined or discussed. Strategic growth is the core belief that directly deals with the reflective options. Various factors are the main causes in the entire tools and techniques of the business. This term is important or recommended as the advanced processes. Various opportunities and strategies are allowed that boost the overall performance of the businesses in these countries (Liu, 2021). The lack of policies which include

preferential treatment for state-owned enterprises, data restrictions, insufficient enforcement of intellectual property rights and cyber theft and America launched the trade war to pressure Beijing to make significant changes to aspects of its economic system that facilitate unfair Chinese trade practices, including forced technology transfers, restricted market access, intellectual property theft and subsidies to state-owned enterprises. American argued that unilateral tariffs would reduce the U.S. trade deficit with China and cause companies to bring manufacturing jobs back to the United States. Between July 2018 and August 2019, the United States announced plans to impose tariffs on more than \$550 billion worth of Chinese products, and China retaliated with tariffs on more than \$185 billion worth of US goods.

The insufficient requirements of the firm are some insufficient tools that directly investigate the entire flow. The secondary source is the method that is useful to collect the data and gather accurate information. That's why the entire management prefers substantial goals (Omond, 2021). Various purposes are required that deals with the better and the sustainable areas. With the development of strong and effective strategies, the management of firms should take reliable information.

Recommendations:

Different recommendations have been required that help to conduct the research.

- The research should use a sufficient and accurate source as the data collection method. It is the process that deals with the reflective way of thinking and builds a higher growth structure (Amaliah, 2021).
- The research should analyze the past or historical news based on the entire trade between the China and US. Because it is a helpful and reliable action that conducts the research.
- By involving international businesses and government reviews to conduct the research study. Because when the research participants are directly involved to make the decisions then it is helpful to increase the better and more reliable goals (Gokan, 2021).
- Different goals and objectives are required that rebuild the substantial areas and motivate the various tools related to the admired challenges.

All of these recommendations help to achieve the objectives of the research and find the best path in which the overall goals can be accomplished (Nong, 2021). All the practices of businesses are reliable sustain the overall phenomena and build substantial performances.
