

**BACK-END DATABASE
And
ONLINE HELP**

for the internet-based information system and virtual shop

“INDUS BOOKS”

BY

Mohammad Ahmad Shahid Zaka

A dissertation submitted to the department of Computer Science in
BAHRIA INSTITUTE of MANAGEMENT and COMPUTER SCIENCE, Islamabad
as partial fulfilment of the requirement of the degree of M.Sc. in
Computer Science

October 1999

PROJECT BRIEF

PROJECT TITLE	VIRTUAL SHOP "INDUS BOOKS"
ORGANIZATION CONSULTED	VANGUARD BOOKS PRIVATE LIMITED
OBJECTIVE	TO CONSTRUCT THE BACK-END DATABASE AND ONLINE HELP FOR THE INTERNET-BASED INFORMATION SYSTEM "INDUS BOOKS"
UNDERTAKEN BY	MOHAMMAD AHMAD SHAHID ZAKA
SUPERVISED BY	DR. SAEED AKHTAR BHATTI
STARTING TIME	JUNE 1999
COMPLETION TIME	OCTOBER 1999
SOFTWARE USED	PERSONAL ORACLE 7, MICROSOFT FRONTPAGE 98
OPERATING SYSTEM	WINDOWS 98
SYSTEM USED	INTEL PENTIUM 300 MHZ

ABSTRACT

The intention is to construct a World Wide Web based core of books, CDs and information. It is that is to create a WWW based information system from which users can select books and CDs of their choice and then order them. To achieve that aim we shall provide the 2-Component book CD system. The books and CDs may be searched on the basis of author, publisher, ISBN number, etc.

The first part of the application shall be in Java. The web site shall contain Java applets. The search engines and ordering forms shall be available to on-line external users. The rights will be reserved for the books and CDs on a WWW based system.

To ***ALMIGHTY***, who created
the Moon, flowers, the Sun and
the other stars.....

ABSTRACT

Our intention is to construct a World Wide Web based store of books, CDs and magazines. It shall be an on-line WWW based information system from where users can select books and CDs of their choice and then order them. To achieve that end we shall provide the E-Commerce facility to users. The books and CDs may be searched on the basis of author, publisher, ISBN number, etc.

The front end of our application shall be in Java. The web site shall contain Java applets. The search engines and ordering forms shall be available to on-line external users. The middle ware will be composed of JDBC. The back end shall be a WWW based database in **Oracle**. This database will be the heart of the application, as it will contain all the information about CDs, books and magazines.

ACKNOWLEDGEMENTS

All words fail me when I think of thanking Allah who has always blessed me with more than what I deserve.

My heartfelt thanks to my supervisor Dr. Saeed Aktar Bhatti, whose continual guidance and moral support has been indispensable to me.

I would like to take this opportunity to thank all my teachers who have always been a source of inspiration and encouragement.

I appreciate the good advice I received from my project colleagues Omar Khalid and Alamgir Mirza.

Last but not least, thanks are due to my family and friends for always being there for me. Their presence is a never-ending source of joy and beauty in my life.

Mohammad Ahmad Shahid Zaka

Preface

This dissertation deals with various aspects of back-end database development including its analysis, design and implementation. It also describes the building of “online help” for the software application.

Chapter 1 of the thesis introduces the project and tells about my part of the software application.

Database Analysis has been discussed in **Chapter 2**. Database entities have been described.

Chapter 3 explains Database Design. This includes discussing tables and their attributes.

Chapter 4 tells in detail why Oracle is best suited for building software applications involved in e-business.

Why Oracle works well with Java and JDBC is told in **Chapter 5**.

Chapter 6 talks about Database Development.

Building of “Online Help” is explained in **Chapter 7**.

Chapter 8 tells the vital importance of software testing.

Bibliography is provided at the end of the thesis.

Contents

1. Introduction	1
1.1 Brief Description of "Indus Books"	2
1.2 Parts of Software Application	2
1.3 Detail of the virtual shop "Indus Books"	2
1.4 My part in the Software Application	3
1.5 Organization Consulted	3
1.6 Phases of Project	3
1.7 Software Development Paradigm	4
2. Database Analysis	5
2.1 Introduction	6
2.2 Entity-Relationship Diagram	7
2.3 Entity Details	8
3. Database Design	12
3.1 Introduction	13
3.2 Table Design	13
3.3 Table Specification	14
4. Why use Oracle for E-business?	23
4.1 What makes Oracle better than any other Internet Computing Platform?	24
4.2 Oracle eliminates the implementation chaos	25
4.3 Oracle offers the widest range of deployment options	26
4.4 What is the Oracle Internet Platform?	27
4.5 Oracle E-certified deployment options	30
4.6 Application hosting with Oracle Service Providers	31
4.7 Oracle e-certified applications	32
4.8 Conclusion	33
5. Why "Oracle" with Java?	34
5.1 Introduction	35
5.2 Oracle and JDBC	35
5.3 Conclusion	35
6. Database Development	36
7. "Online Help"	42
7.1 Introduction	43
7.2 Importance of "Online Help"	43
7.3 Software used to build online help	43
8. Software Testing	49
8.1 Introduction	50

8.2	Objective of Testing	50
8.3	Testing Strategies	50
8.4	Special Tests	51
Bibliography		52
