## **ACKNOWLEDGEMENTS**

First of all We indebted to **Almighty Allah**, Lord of Creations, of our lives and of everything in the Universe and **Holy Prophet Mohammad (S.A.W)** Whose blessings enabled us to perceive and pursuit higher ideas of life, who has given us the courage insight and knowledge to complete this project.

We would like to acknowledge the help of persons who helped us in our project and in our educational career especially Mr. Fazal Wahab for supervising us in this project, and all other teachers for helping us in the development and documentation of this project, We can never forget these teachers due to their politeness and suggestions which will remain guiding us.

Shahzada Farhad,  
Shafiq ur Rehman.

## PREFACE

It is a matter of great pleasure for us to complete the task for the preparation of this report. We want to mention here that despite an assiduous proof reading some misprints and inaccurate wording might have crept in for which we are responsible and we shall be thankful to readers who point them out. Any suggestions for improvement will be highly appreciated.

Shahzada Farhad,  
Shafiq ur Rehman.

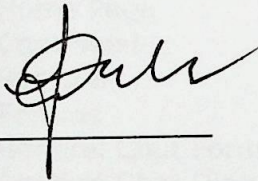

## **ABSTRACT**

Aim of this project was to develop a general purpose web portal that provides a centralized place for users to share different types of information by different means. It provides online user interaction through discussion forums. Users can post different topics, and other user can answer to the topics. News section provides latest news which is retrieved from different News Agencies on the internet. Article section provides the facility to view writings and ideas of different writers about different categories. Download section provides latest software available for download. Classified section provides users to post their advertisement free, and to browse the advertisement according to their interest. Links section provides web links in different categories. We have tried to provide a user friendly and easy administration module, which is intended for web master to manage the portal in an easy way.

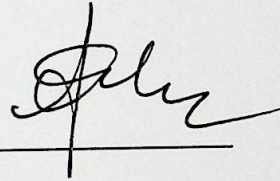

Domain of a web portal can be very wide, but we have tried our best to make it general and useful for the users.

## APPROVALS

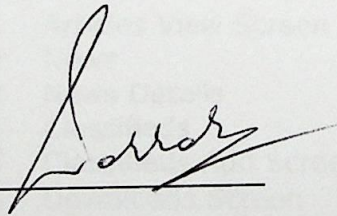

We accept the work contained in this report as a confirming to the required standard for the partial fulfillment of the degree of MCS degree with specialization in Software Engineering.
