

# PAKISTAN POST OFFICE EXPRESS MAIL TRACK & TRACE SYSTEM

[ DATABASE DESIGN ]

IMRAN ATA

SUPERVISED BY

**MR. FAZAL WAHAB**

A report is submitted to the department of Computer Science,  
Bahria Institute of Management and Computer Sciences, Islamabad

In partial fulfillment of requirement of the degree of  
M.C.S. Communication & Networks

## DEDICATIONS

*I would like to dedicate this work to my parents, sisters and brother for the love, support, prayers and understanding that only a family could offer.*

*Specially, I would like to acknowledge the efforts of my adored uncle Mr. Riaz Mahmood who played an imperative role for building my career.*

## Chapter 1-Introduction

1.1	Introduction	2
1.2	Existing System	3
1.2.1	Express Mail Services	3
1.2.1.1	Air Express	3
1.2.1.2	Urgent Mail Service	3
1.2.1.3	International Speed Post	3
1.2.1.4	Local Express Service	3
1.2.1.5	Fax Mail	3
1.2.2	Express Financial Services	4
1.2.2.1	Fax Money Order	4
1.2.2.2	Urgent Money Order	4

## Chapter 2-Proposed System

2.1	Proposed System	7
2.1.1	Scope	7
2.1.1.1	A Vague View	7
2.1.1.2	Formal View	7
2.1.2	Process Model	7
2.1.2.1	Phases of Spiral Model	9
2.1.3	Salient Features of Proposed System	12
2.1.3.1	Functionality Required At Booking Office	12
2.1.3.2	Functionality Required At The District Mail Office	13
2.1.3.3	Functionality Required at the Delivery Offices	13
2.1.4	Tools & Selection Criteria	15
2.1.5	Planned Effort Metric	16

## Chapter 3-System Design

3.1	UML Modeling	18
3.1.1	Use Case Diagrams	18
3.1.2	Sequence Diagrams	22
3.2	Database Design	31
3.2.1	Database Design for Booking Office	31
3.2.1.1	Table Summary Report	31
3.2.1.2	Tables Description	32
3.2.2	Database Design for District Mail Office	38
3.2.2.1	Table Summary Report	38
3.2.2.2	Tables Description	39
3.2.3	Database Design for Delivery Office	44
3.2.3.1	Table Summary Report	44
3.2.3.2	Tables Description	44

## Chapter 4-Implementation & Testing

4.1	System Implementation	48
4.1.1	Modular Divisions	48
4.1.2	Implemented Effort Metric vs. Planned Effort Metric	48
4.2	Testing Evaluation	49
4.2.1	Tests Conducted During Software Engineering Process	49
4.3	Test Cases	51
4.3.1	Booking Office	51
4.3.1.1	Booking Office Admin	51
4.3.1.2	Booking Office Clerk	55
4.3.2	District Mail Office	58
4.3.2.1	District Mail Office Admin	58
4.3.2.2	District Mail Office Clerk	61
4.3.3	Delivery Office	64
4.3.3.1	Delivery Office Admin	64
4.3.3.2	Delivery Office Clerk	70

## Chapter 5-Conclusion

5.1	Conclusion	74
5.2	Future Development	75

<b>Appendix: A - User Manual</b>	76
----------------------------------	----

<b>Appendix: B - Team Members</b>	151
-----------------------------------	-----

<b>Bibliography - World Wide Web &amp; Other Resources</b>	154

## ACKNOWLEDGMENTS

First of all I thank Almighty ALLAH for giving me the skills, talents and opportunity to work in such a challenging and exciting environment.

I would like to acknowledge the gentle supervision of Mr. Fazal Wahab and the proper guidance of Dr. M. A. Khan, which enabled us to complete this project successfully.

Also I would like to acknowledge the leadership of our Project Manager Mr. Laique Ahmed, cooperation of PPO Personnel for helping us in the in-depth understanding of the whole system.

There are numerous people without whom this work might never have been possible. Among those who deserve credit are Mr. Fazal Wahab for developing our basic programming concepts, Mr. Arshad Javeed Minhas for teaching System Analysis and Design, Mr. Faisal Jalil for Software Engineering, Mr. Sajid Rasheed for giving the sense of quality not only in professional field but in every aspect of life, Mr. Nadeem M. Khan for giving the real sense of Database and all the teachers of MCS for grooming our career towards this profession.

In the end, I would like to acknowledge Bahria University for making us distinctive professionals of our field.

## ABSTRACT

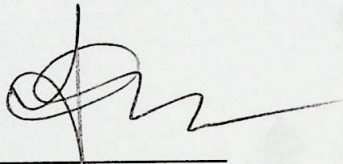

To automat only the remote offices (Booking Office, District Mail Office, Delivery Office) for capturing the Point Of Sale (POS) data from the origin. This data will be ultimately replicated to the central server, which will be located at the head quarter.

This application will help both the management and employees of PPO in performing their work quickly and accurately, making their decision making, brisk and in time. It provides complete automation of manual system in the form of Distributed System.

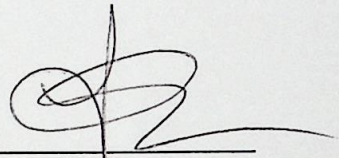

PPO will maintain information about all booked articles and about the history of its employees and the Customers can now inquire about complaint or enquire for particular information.

# APPROVALS

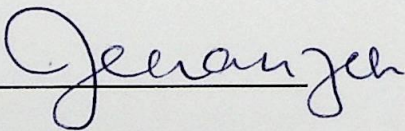

We accept the work contained in this thesis as conforming to the required standards for the fulfillment of MCS (Specialization in Communication & Networks) degree.
