

Websites Development for

United Nations System
In Pakistan

by

Aafia Kamal

Supervised by

Mr. Fazal Wahab

A report is submitted to the department of Computer Sciences,
Bahria Institute of Management & Computer Sciences, Islamabad.
In partial fulfillment of requirement of the degree of
MCS Software Engineering

Department of Computer Sciences
Bahria Institute of Management and Computer Sciences, Islamabad
Bahria University Islamabad

ACKNOWLEDGEMENT

DEDICATED TO

*To my loving Parents whose prayers, motivation, and support
has enabled me to carry out this project
successfully.*

ACKNOWLEDGEMENT

First of all we are thankful to almighty Allah; most beneficent and most merciful, without his blessings completion of my current endeavor was not possible.

I owe a deep debt of gratitude to my reverend teacher, **M. Fazal Wahab**, Head of the Computer Sciences Department, Bahria University, Islamabad, for his indispensable guidance and keen interest in my project work. I am also grateful to all other teachers and colleagues for helping me much in the development and documentation of this project; I can never forget them due to their politeness and suggestions, which will remain guiding me in each and every walk of life.

Above all, I owe this success to loving parents and family without whose pure prayers, true encouragement; moral and financial support has enabled us to complete this project successfully.

Last, but not the least, I remain thankful to all my friends and class fellows for their good wishes and help.

PREFACE

I want to mention here that despite an assiduous proof reading some misprints and inaccurate wording might have crept in for which I am responsible and I shall be thankful to readers who point them out. Any suggestions for improvement will be highly appreciated.

ABSTRACT

This report contains details at developing a project for United Nations system in Pakistan. The project is part of the requirements of the Master's Degree in Computer Sciences of the Bahria University, Islamabad.

The aim of the project was to create a common ground for the people who benefit from the services of the United Nations, Especially for the employees of the United Nations.

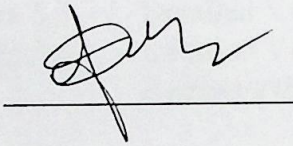

The websites provide the user with an environment where they can interact directly with the UN IT department and get fast solution to their problems. It provides discussion forum where user can discuss on any topic they like.

The other main module of the project was the site stats which help us keeping informed about the popularity of the website, also keep track of the user and their activities.

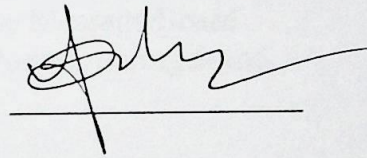

The main effort in the project development was made on the design of the websites, which was the major requirement of the clients. The development of multithreaded Discussion board was a difficult job.

APPROVAL

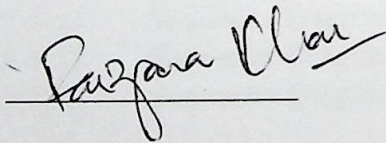

We accept the work contained in this report as a confirming to the required standard for the partial fulfillment of the degree of MCS with specialization in Software Engineering.

Table of Contents

Dedication	I
Acknowledgements	II
Preface	III
Abstract	IV
Approvals	V
List of Figures	VI
Chapter 1 – Introduction	1
Chapter 2 – Literature Survey	9
Chapter 3 – Proposed System	15
Chapter 4 – System Architecture	40
Chapter 5 – System Design	53
Chapter 6 – Implementation & Testing	70
Chapter 7 – Conclusion and Future Development	77
Appendix I – User Guide	82
Bibliography – Internet & Other resources	103

Table of Contents

Chapter 1 – Introduction

- 1.1 Brief Company Introduction
- 1.2 Project Background
- 1.3 Project Overview

Chapter 2 – Literature Survey

- 2.1 Evolution of Internet/Web
- 2.2 Benefits
- 2.3 Existing System
- 2.4 Why use of Internet/Intranet based Solution

Chapter 3 – Proposed System

- 3.1 About the System
- 3.2 System Goal and Objective
- 3.3 Major Modules
 - 3.3.1 UNDP Intra Net Website
 - 3.3.2 IT Mag Website
 - 3.3.3 ICT-Unit Website
 - 3.3.4 Development of HR Forum
- 3.4 Process Model
 - 3.4.1 Water Fall Model
 - 3.4.2 Spiral Model
- 3.5 Phases of Spiral Model
- 3.6 Site Disposition
- 3.7 Project Scheduling
- 3.8 Tools & Techniques
- 3.9 System Requirements

Chapter 4 – System Architecture

- 4.1 Organization LAN/ WAN Infrastructure
- 4.2 How Discussion forum works

Chapter 5 – System Design.

5.1	System Modeling	55
5.1.1	UML Modeling	55
5.1.2	Use Case Diagram	55
5.1.3	Sequence Diagram	63
5.1.4	Deployment diagram	69

Chapter 6 – Implementation & Testing

6.1	System Implementation	72
6.1.1	Modular Divisions	72
6.1.2	Effort Metric	73
6.2	Testing Evaluation	74

Chapter 7 – Conclusion & Future development

7.1	Conclusion	78
7.2	Future Development	79
7.1.1	IT-MAG Future development	79
7.1.2	ICT-Unit website Future development	80
7.2.3	Discussion Forum Future development	80
7.2.4	Site Stats Future development	81
