Mr. Azhar Kalim

A thesis submitted to the department of Computer Science,
Bahria Institute of Management and Computer Sciences, Islamabad

In the partial fulfillment of requirement for the degree of MCS

Department of Computer Science
Bahria Institute of Management and Computer Sciences,
Bahria University, Islamabad

DEDICATION

To my family, friends and respected teacher.

ACKNOWLEDGEMENTS

I would like to thank my parents and friends for their support through out the project. I am especially thankful to Mr. Azhar Kalim, project supervisor & Mr. Talib H. Kayani, whose valuable advice and support has helped me during this project.

CERTIFICATE

We accept the work contained in this report as a confirming to the required standard for the partial fulfillment of the degree of MCS in the subject of _____

Head of Department

Supervisor

Internal Examiner

External Examiner

ABSTRACT

Creating meaningful business solutions on time and within budget requires a proven approach. Such an approach provides an adaptable framework for successfully delivering information technology solutions faster, requiring fewer people, and involving less risk, while enabling higher quality results. A framework helps teams directly address the most common causes of technology project failure in order to improve success rates, solution quality, and business impact. Different approaches or frameworks have been created to deal with the dynamic nature of technology projects and environments, which also fosters the ability to adapt to continual change within the course of a project. This research project highlights the factors which are crucial for software development, the root cause of the current industry status and the importance and problems faced in attainment of internationally recognized quality certifications.

TABLE OF CONTENTS

1 Project Overview	1
1.0 Project Overview	2
1.1 Purpose of the Project	3
1.2 Scope of the Project	3
1.3 Initial Investigation	4
2 Designing The Questionnaire	5
2.0 First Draft	6
2.0.1 Drawbacks	7
2.1 Second Draft	7
2.1.1 Drawbacks	7
2.2 Third Draft	8
2.2.1 Drawbacks	8
2.3 Fourth Draft	8
3 Current SQA Practices in Pakistan	9
3.0 The Role of Software Quality Assurance	10
3.1 Basic Concepts and Definitions	10
3.1.0 Standards and Procedures	10
3.1.1 Procedures	11
3.1.2 Software Quality Assurance Activities	11
3.1.3 Product Evaluation	11
3.1.4 Process Monitoring	12
3.1.5 Audit	12
3.2 Interaction of SQA with other Assurance Activities	12
3.2.0 Configuration Management Monitoring	12
3.2.1 Verification and Validation Monitoring	14
3.2.2 Formal Test Verification	15
3.3 Interaction of SQA in SDLC Phases	15
3.3.0 Software Concept and Initiation Phase	16
3.3.1 Software Requirement Phase	16
3.3.2 Software (Preliminary) Design Phase	16
3.3.2 Software Detailed Design Phase	16
3.3.4 Software Implementation Phase	17
3.3.5 Software Integration and Test Phase	17
3.3.6 Software Acceptance and Delivery Phase	19
3.4 Current Pakistani Industry Practices	20
4 Importance & Problems Faced in Quality Certifications	23
4.0 Analysis	24
4.0.1 The “Why bother about” Syndrome	26
4.0.2 A Reactive Approach	26
4.0.3 Expensive to Implement	27
4.0.4 Unaware Management	28

TABLE OF CONTENTS

4.0.5 Partially Aware Management	29
4.0.6 Lack of Awareness Among Employees	30
4.0.7 Lack of Motivation	31
4.0.8 Selective Approach	33
4.0.9 Proceeding with Implementation	34
5 Case Study: Microsoft Technologies	36
5.0 Introduction	37
5.1 Key MSF Terms	38
5.2 Foundational Principles	40
5.3 MSF Models	40
5.3.0 The MSF Team Model	41
5.3.1 Communication	41
5.3.2 Quality Goal MSF Team Role	42
5.3.3 The MSF Process Model	43
5.3.4 MSF Disciplines	45
5.3.4.0 The MSF Project Management Discipline	45
5.3.4.1 The MSF Risk Management Discipline	47
5.3.4.2 The MSF Readiness Discipline	48
5.4 Microsoft's Use of MSF	50
6 Conclusion	51
Appendix A	53
Appendix B	65
Appendix C	70
Appendix D	72

LIST OF FIGURES

3.0 SDLC	20
5.0 MSF Components Examples	39
5.1 MSF Team Model	41
5.2 MSF Process Model	43
5.3 MSF Risk Management Process	53
5.4 MSF Readiness Management Discipline	50
