APPROVAL FOR EXAMINATION

Candidate's Name: Asad Masood Rao Registration No.: 41041
 Thesis Title: _____

I hereby certify that the above candidate's thesis has been completed to my satisfaction and, to my belief, its standard is appropriate for submission for examination. I have also conducted plagiarism test of this thesis using HEC prescribed software and found similarity index at 17% that is within the permissible limit set by the HEC for the MBA thesis. I have also found the thesis in a format recognized by the Department of Business Studies.

Supervisor's Signature: [Signature] Date: 17.08.21

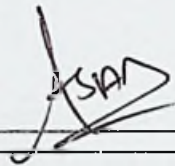

Supervisor's Name: M. Bushra Ali

HOD's Signature: _____ Date: _____

Declaration of Authentication

I, hereby, declare that no portion of the work referred to in this thesis has been submitted in support of any application for another degree or qualification of this university or any other institution of learning.

Student's Signature: _____

A handwritten signature in black ink, appearing to be 'ASAD', written over a horizontal line.

Dedication

My thesis is dedicated to my intellectual father for always thinking ahead of me and never declining my moral, my supervisor who always was there to guide us in the right direction for the completion of my research.

Acknowledgement

I am very thankful to my parents for being a great support. I would like to acknowledge my supervisor Mr Zeeshan Ali for sharing his skills and experience which was of great benefit and learning for me and successfully compiling this research

Abstract

Purpose:

The purpose of this research was to find out the effect of inventory management practices on organizational performance in public and private hospitals.

Methodology & Design:

The study as use the explanatory design of research as it helps in develop a cause and effect relationship. In this research 115 questionnaires have been filled to analyze the data using Reliability test, ANOVA and Regression analysis.

Findings:

After performing the research, we were able to identify inventory related conflicts and problems along with their most convenient solutions. Furthermore there were a lot of key factors that were ignored and never addressed although they played a pivotal role in assessing inventory management. The variables found through this research lead to effective inventory management coming up with better and more efficient organizational performance. Organizational performance can be boosted by a several methods but the most effective one was by applying different techniques and programs enhancing a rigid control over inventory management related issues and thus coping with them could become easier.

Limitations:

Limitations observe during the research there are lots of restrictions and limitation which I have to face like hospital restrictions, Covid-19 restrictions and ignorance and lack of interest of managers.

Recommendations:

My recommendation to all the readers and analyzers to implement the practices which most of the people say that is useful for making better the performance of the hospitals.

Keywords:

Organizational Performance, Inventory Shrinkage, Inventory Record Accuracy, Inventory Investment, Inventory Turnover.
