

Web Based Job-Hunting

By

Badiha Noureen

Supervised By

Mrs. Saima Jawad

A report is submitted to the department of Computer Science,
Bahria University of Management & Computer Sciences, Islamabad.

In the partial fulfillment of requirement for the degree of BCS.

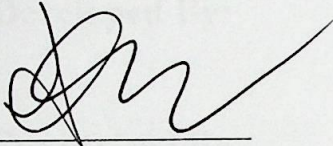

Department of Computer Science

Bahria University of Management and Computer Sciences, Islamabad

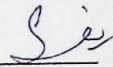

University of Peshawar, Peshawar

CERTIFICATE

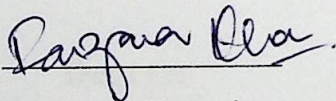

We accept the work contained in this report as a confirmation to the required standard for the partial fulfillments of the degree of BCS (Hons).

Project In Brief

Dedication

Project Name: Job Hunter

Developed By: Badiha Noureen

Supervised By: Mrs. Saima Jawad

Start Data: July 10th, 2002

End Date: November 15th, 2002

Degree: BCS (Hons)

Institute Name: Bahria Institute of Management
And Computer Sciences.

Dedication

Dedicated to my loving parents, brother and sister.

Acknowledgments

Firstly, I wish to thank Almighty Allah through Whose unlimited blessings, I had completed the project.

I would like to thank Mrs. Saima Jawad, my supervisor, with whom I worked. She supported me giving new ideas and dimensions throughout the completion of the project.

I am grateful to all my honorable teachers for their efforts and valuable moral support provided during the entire course of BCS.

I would also like to thank my family for their support over the last few years, their encouragement and for being there when I needed them.

Badiha Noreen

December 2002

Abstract

Today, the web-matured user wants specialization. Multipurpose portals no longer rule the roost. The emphasis today is on deep, relevant, specific and quality information. Job-hunting via the Internet simplifies the process of identifying outstanding opportunities

This project is about a web resource called Job-Hunter, which provides online job and employee search with many other facilities. This is an employee-employer interaction system, with little or no third-party involvement. Targeted at small-scale employees, the system provides a secure, simple technique of posting vacancies and for posting candidate resumes. All transactions take place between Candidate and Employer. Users can access only those areas of the database that they have been authorized to.
