

E BILLING SYSTEM

SUHAIB DOGAR (992CS122)

Supervised by

Mr. Zakria Mian

A report is submitted to the department of computer sciences,
Bahria institute of Management and Computer Sciences, Islamabad.

In partial fulfillment of requirement for the degree of BCS (Hons).

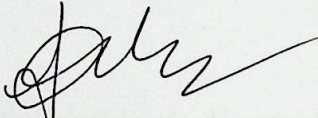

Department of Computer Sciences

Bahria institute of Management and Computer sciences , Islamabad.

University of Peshawar, Peshawar.

CERTIFICATE

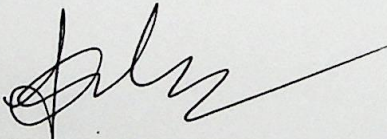

We accept the work contained in this report as confirming to the required standard for the partial fulfillment of degree of BCS in the subject of Sales and Inventory based Software.

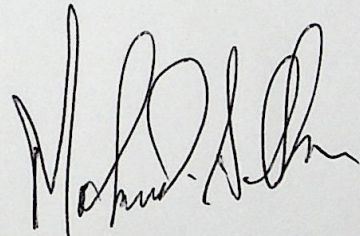

Head of Department
(Mr. Fazal Wahab)

Supervisor
(Mr. Zikria Mian)

Internal Examiner

External Examiner

DEDICATION

This project is dedicated to our parents and family who supported us on every turn and saw us through every difficulty.

ACKNOWLEDGEMENTS

All Praise to the Allah Almighty, the most Merciful, the most Gracious, without his help and blessing it was not possible to complete the Project.

This effort wouldn't have materialized into a reality without the guidance of so many people. We would like to pay thanks to our teachers for their valuable guidance and supervision.

Many words of thanks for the supervisor **Mr. Zakria Mian** . He kept us encouraging all the time and provided guidance whenever it was required. Finally we would like to pay our deep gratitude to our loving parents, our sisters and brothers for their good wishes and encouragement.

ABSTRACT

Electronic billing and payment is hardly a new concept. Banks and financial institutions have been exploring electronic bill presentment for more than a decade as part of their home-banking offerings. But with the emergence of the web, the electronic-billing market has grown real legs, especially in the past year or so.

The product developed is an online billing system for WAPDA. This is a shrink-wrapped general purpose product as it can be implemented on various clients like PTCL, WAPDA, Sui Northern Gas company, Cellular phone services etc. Our product is capable of providing the user with a host of ways to pay his/her bills. These include the WAP and online billing system. The product is a part of WAPDA information system.

TABLE OF CONTENTS

	Pages
<u>Chapter 1 INTRODUCTION</u>	1
1.1 Project Overview	2
1.2 Present Information Processing	2
1.2.1 Problems	2
<u>Chapter 2 LITERATURE SURVEY</u>	5
2.1 E-Billing	6
2.2 Wireless Application Protocol (WAP)	7
2.2.1 Working of Wireless Application Protocol	7
2.3 WML (Wireless Markup Language)	8
2.4 Mobile Internet Toolkit	8
2.4.1 Nokia Mobile Internet Toolkit	9
2.5 Mobile Commerce	10
<u>Chapter 3 PROPOSED SYSTEM</u>	11
3.1 Overall Description	12
3.2 Product Functions	12
3.3 Software Requirement Specification	12
3.4 DOCUMENT CONVENTIONS	13
3.5 Intended Audiences and Reading Suggestion	13
3.6 Overview	13
3.7 Business Processes	14
3.8 User Classes & Characteristics	15
3.9 Operating Environments	15
3.10 Design & Implementation Constraints	15
3.11 User Documentation	17
3.12 Assumption & Dependencies	17
3.13 Data Flow Diagrams	17

4.1 External Interface Requirements	31
4.1.1 High Level Users	31
4.1.2 Low Level Users	32
4.2 Hardware Interfaces	34
4.2.1 WEB Interface	35
4.2.2 Software Interfaces	35
4.2.3 Database Interface	35
4.2.4 Operating System Interfacing	35
4.3 Programming Interface Protocols	36
4.4 Communication Interfaces	36
4.5 System Features	37
4.5.1 Wireless Application Services	37
4.5.2 Internet Based Application	39
4.6 Physical Design	40
4.7 Entity Relation Diagram	43

5.1 Testing	45
5.1.1 Unit Testing	45
5.1.2 Integration Testing	45
5.1.3 Validation Testing	45
5.2 Software Evaluation	45
5.3 Software Quality Attributes	47
5.4 Implementation	48
5.4.1 Training Personal	48
5.4.2 Conversion	48
5.4.2.1 Parallel Conversion	48
5.5 Backups	48

6.1 Telephony	50
6.1.1 Interface Speciation	50
6.1.2 Telephony Interface	51

6.2 System Feature	52
6.2.1 Telephony Application Services	52
6.2.3 Description and Priority	52
6.2.4 Stimulus/Response Sequences	52
6.3 Functional Requirements	53
6.4 Expandability	
6.4.1 Data Expandability	53
6.4.2 Function Expandability	53
6.4.3 User Expandability	53
6.5 Maintainability	53
<u>Chapter 7 CONCLUSION</u>	<u>54</u>
8.1 Conclusion	55
<u>APPENDIX</u>	<u>56</u>
1 User Manual	
2 Bibliography
