

**Online Adaptive Testing System
Client Side Development**

By
Zubair Aziz

Supervised by
Mr. Jehanzeb Ahmed

**A report is submitted to the Department of Computer Science,
Bahria University
Islamabad**

In partial fulfillment of requirement of degree of BCS

**Department of Computer Science
Bahria Institute of Management & Computer Sciences
Islamabad**

Dedication

I want to dedicate this to my family and friends and most of all to my mother who always exhibited unflinching faith in me, through all the high and lows of my life.

Zubair Aziz

Acknowledgements

I would like to thank Almighty Allah whose blessing are always with me and without His blessings this work would not have been completed. Furthermore a very special note of thanks goes to our parents whose heart-felt prayers, appreciation, and support has always been a valuable asset and a great source of inspiration for us.

We owe a special thanks to our supervisor Mr. Jehanzeb Ahmed whose valuable suggestions helped us working on this project. We are indebted to our project coordinator and all teachers for their co-operation and encouragement to attain our goal.

The acknowledgement will remain incomplete without special thanks to my friends for their excellent cooperation and their nice companionship. I am thankful to all of my class fellows for their love and good feelings about me.

Zubair Aziz

Abstract

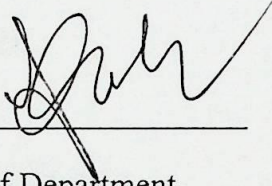

As we slowly but steadily drift out of the natural era, with the advent of internet capabilities, we need to expand those primitive capabilities and integrate them with the power of the Internet. Users still have to deal with today's realities of online testing i.e., online examination, online shopping store, etc., which will require a higher level of flexible control to manage both accessibility and the cross-modal interfaces. Therefore, it is time to move forward, and we do not mean just consolidating online examination testing; we mean consolidating personalized user information and control functions for dynamic use across all forms of access to and from an individual user for conversational connections and messaging exchanges.

This effort was made possible by complex user level controls provided by tools like ASP, JavaScript, ODBC, and HTML.

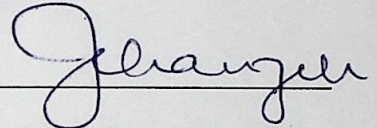

These tools allowed us to formulate a fool proof adaptive testing environment to benchmark the test takers' abilities to their best.

Certificate

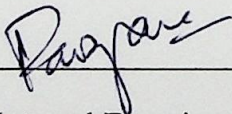

We accept the work contained in this report as confirming to the required standard for the partial fulfillment of degree of BCS in the subject of Sales and Inventory based Software.

Project in Brief

Project Name: Online Adaptive Testing System
Developed by: Zubair Aziz
Supervised by: Mr. Jehanzeb Ahmed
Start Date: July 01, 2003
End Date: September 07, 2003
Degree: BCS (Hons)
Institute Name: Bahria Institute of Management &
Computer Sciences

Table of Contents

1	Introduction.....	2
1.1	Background.....	2
1.2	Need and Purpose.....	2
1.3	Computerized Testing.....	3
1.4	What is Online Adaptive Testing?.....	4
1.5	Project Scope.....	5
1.6	Goals and Objective.....	5
2	Phases of a Project.....	7
2.1	System Analysis.....	7
2.2	Requirement Analysis.....	7
2.3	System Specification.....	7
2.4	System Design.....	7
2.5	System Development.....	8
2.6	System Testing.....	8
2.7	System Implementation.....	8
3	Literature Survey.....	10
3.1	Computer Adaptive Testing.....	10
3.2	Client Server Relationship.....	11
3.3	Static Pages Vs Dynamic Pages.....	13
3.3.1	Dynamic Web Pages.....	13
3.3.2	Dynamic Web Pages and ASP.....	14
3.4	How ASP Pages look like?.....	14
3.5	ASP Code – Browser Independent.....	15
3.6	Advantages of using a server side technology.....	15
3.7	Microsoft Certifications.....	15
3.7.1	MCP Exam.....	16
3.7.2	MCAD Exam.....	16
3.7.3	MCSD Exam.....	17
3.7.4	MCSE Exam.....	18
3.7.5	MCDBA Exam.....	18
3.7.6	MOUS Certification.....	19
3.8	CISCO Certifications.....	19
4	Proposed System.....	24
4.1	Introduction.....	24
4.1.1	System Overview.....	24
4.1.2	Objectives of Proposed System.....	24
4.2	System Design.....	24
4.2.1	Interface Design Phase.....	25
4.2.2	Logical Database/Interface Design.....	25
4.3	Plan and Elaborate.....	27
4.4	Features of Proposed System.....	27
4.5	Functions.....	27
4.5.1	Student Registration.....	28
4.5.2	Exam Time.....	28

4.5.3	Exam Conduction.....	29
4.5.4	Store History	29
4.6	Data Flow Diagrams	29
4.7	System Requirements.....	33
4.8	Development Tools and Techniques.....	34
5	Implementation	36
5.1.1	Training Personnel	36
5.1.2	Conversion	36
5.2	Proposed System Conversion	37
5.3	Post Implementation	37
5.4	Signing in to Online Adaptive Testing	38
5.5	Candidate Access	38
5.6	Online Administrator Access	39
6	Testing.....	41
6.1	Testing Levels.....	41
6.1.1	Unit Testing	41
6.1.2	Integration Testing.....	42
6.1.3	System Testing.....	42
6.2	Special Testing.....	42
6.2.1	Peak Load Testing.....	42
6.2.2	Performance Time Testing.....	42
6.2.3	Recovery Testing	42
6.3	White-Box Testing.....	43
6.4	Black-Box Testing	43
6.5	System Evaluation	43
7	Conclusions.....	46
7.1	Merits of the System	46
7.2	Efficiency	46
7.3	Reduced Errors.....	46
7.4	Query System.....	46
7.5	List of Values.....	47
7.6	Better Response Time	47
7.7	System Security	47
7.8	Modular Approach	47
8	Future Prospects.....	49
8.1	Current Environment	49
8.2	Performance Development.....	49
8.3	Simulation Development	50
8.4	Solution-Based Development	50
8.5	Cross-Vendor Development.....	50
8.6	Online Entry Test.....	51
8.7	Road Traffic Authority	51
9	Screen Shots.....	53
9.1	Main Page	53
9.2	Login Page	54
9.3	User Area	55

9.4	Test Page.....	56
9.5	Hot Links	57
9.6	About Us	58
9.7	Admin Area.....	59
9.8	Manage User Profile	60
9.9	Edit Test	61
