Acknowledgement

First of all I am thankful to Almighty '**ALLAH**' who enabled me to complete this project.

I am also highly grateful to my project supervisor **Mr. Azhar Kaleem** whose fabulous suggestions, invaluable advice and encouragement throughout the completion of project.

I am also thankful to my teaching staff at BIMCS, Islamabad, whom kind guidance and on time support made us to show our presence in the fast growing field of Information Technology.

ABSTRACT

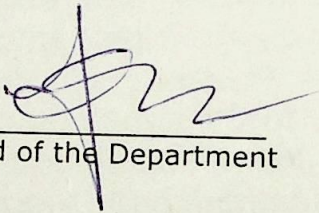

This document describes the analysis, design, and implementation of the Library system project. In this project, I developed software that is very useful for all the Bahria University Students and the Bahria University Staff members. This Web site will allow the members to access the Bahria Library online. The users can issue, return and view the library books online and also download E-books.

This web site has administrator rights which are with the librarian. He or she can add, modify, and delete the user accounts and the books record. And can also upload the e-books for the members.

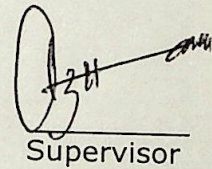

Approvals

I accept the work contained in this thesis as confirming to the required standards for the fulfillment of BCS degree.
