Final Year Project Report

Engr. Asif Raza

This report is submitted as required for the Project in accordance with the rules laid down by the Bahria University as part of the requirements for the award of the degree of Bachelor of Engineering. I/We declare that the work presented in this report is my/our own except where due reference or acknowledgement is given to the work of others.

I. Acknowledgments

We would like to earnestly thank the following individuals for acknowledging the idea for this project and helping us develop it;

Engineer Asif Raza Rizvi, project supervisor, for his continuous impeccable support, enlightening guidelines, and effective recognition of the problem and solution.

Engr. Dr. Shoaib Mughal, head of BUKC CE department, for his guidelines on research for the project.

Doctor Rizwan Iqbal, BUKC CE department, for effectively keeping us updated with the deadlines, events, and activities involving the final year projects.

Our parents, for providing the space, financial support, and emotional and moral support to us through our toughest times with this project.

II. Abstract

Proper navigation and detailed perception in familiar or unfamiliar environments are the main roles for human life. Eyesight sense helps humans to abstain from all kinds of dangers and navigate to indoor and outdoor environments. These are challenging activities for blind people in all environments. Many assistive tools have been developed by the blessing of technology like braille compasses and white canes that help them to navigate around in the environment. A vision and cloud-based navigation system for the visually impaired or blind person was developed. Our aim was not only to navigate them but also to perceive the environment in as much detail as a normal person. The proposed system includes ultrasonic sensors detecting obstacles, cameras to capture images to perceive the environment using deep learning algorithms. Blind people interacted with the whole system through a speech recognition module and all the information was stored in the cloud. Android applications is developed to track blinds so that guardians were monitoring them while visiting and reached them in an emergency. The experimental results showed the proposed system could provide more plenty information and user-friendly interaction.

III. Table of Contents

CHAPTER 1. INTRODUCTION.....	13
1.1. Purpose of this Project.....	14
1.2. Purpose of the Document.....	14
1.3. Objective of the Project.....	14
1.4. Scope of the Project.....	15
1.5. Overview of the Project.....	15
1.6. Context Diagram.....	16
1.7. System Structure.....	17
CHAPTER 2. BACKGROUND AND LITERATURE REVIEW.....	18
2.1 Existing System.....	19
2.1.1 Existing System Description.....	19
2.1.2 Existing System Problems.....	20
2.2 Related Work.....	21
CHAPTER 3. AIM AND STATEMENT OF PROBLEM.....	22
3.1 Problem Statement.....	22
3.2 Aim.....	23
3.3 Tackle the Problem.....	24
CHAPTER 4. ANALYSIS AND DESIGN.....	25
4.1 System Requirements.....	25
4.1.1 Functional Requirements.....	25
4.1.2 Non-functional Requirements.....	26
4.2 Design Constraints.....	27
4.2.1 Hardware and Software Environment.....	27
4.2.2 End-User Characteristics	29
4.3 System Architecture and Program Flow.....	30
4.3.1 Major and Sub Modules.....	30
4.4 Data Flow.....	34
4.5 Architectural Strategies.....	35
4.5.1 Algorithm to be used.....	35

4.5.2 Reuse of Existing Components.....	35
4.5.3 Development Method	36
4.6 Detailed System Design.....	38
4.6.1 Detailed Component Description.....	38
4.7 Actor Use Case.....	40
4.7.1 Actor Use Case Diagram.....	40
4.8 Gantt Chart.....	41
4.10 Interface of System.....	42
CHAPTER 5. IMPLEMENTATION.....	45
CHAPTER 6. TESTING.....	46
6.1 Testing Approaches.....	46
6.1.1 Obstacle Detection.....	46
6.1.2 Sound Variation.....	47
6.1.3 Real Time Image Processing.....	48
6.1.4 Route Information.....	49
6.1.5 Voice Recognition.....	50
CHAPTER 7. CONCLUSION.....	51
CHAPTER 8. FUTURE WORK.....	52
APPENDIX A: CODE.....	53
APPENDIX B: REFERENCES.....	60
APPENDIX C: SOFTWARE REQUIREMENT SPECIFICATION.....	61
1. INTRODUCTION.....	61
1.1 Work Breakdown Structure.....	61
1.2 Context Diagram.....	62
1.3 Project Overview.....	63
2. SPECIFIC REQUIREMENTS.....	64
2.1 External Interface Requirements.....	64
2.1.1 User Interface.....	64
2.1.2 Hardware Interface.....	64
2.1.3 Software Interface.....	65
