DECLARATION

We hereby declare that this project report is based on our original work except for citations and quotations which have been duly acknowledged. We also declare that it has not been previously and concurrently submitted for any other degree or award at Bahria University or other institutions.

Signature : 

Name : SYEDA RAFEYA HAQUE

Reg No. : 43802

Signature : 

Name : SUBIKA SABIR

Reg No. : 41357

Date : 16/12/2019

APPROVAL FOR SUBMISSION

We certify that this project report entitled **“EMOTION/MOOD DETECTION ON TWITTER TWEETS BY USING SENTIMENT ANALYSIS”** was prepared by **SUBIKA SABIR** and **SYEDA RAFEYA HAQUE** has met the required standard for submission in partial fulfilment of the requirements for the award of Bachelor of Computer Science (Honours) at Bahria University.

Approved by,

Signature :

Supervisor : **Mr Mohd Shahid Khan**

Date : **16/12/2019**

ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express our gratitude to my research supervisor, Mr. Muhammad Shahid for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, we would also like to express gratitude to our loving parents and friends who had helped and given us encouragement.

EMOTION/MOOD DETECTION ON TWITTER TWEETS BY USING SENTIMENT ANALYSIS

ABSTRACT

The utilization of media platform has grown bigger over the years. Enormous amounts of information is obtained from social media alone. People express their sentiments using social site twitter. In this study we have discussed how data and information obtained from twitter in the form of tweets can be helpful in detecting moods of people. This study is performed on the premise of emotion prediction. We perform emotion detection of the collected twitter data and explain discovered phenomena. Multiple algorithms like Naïve Bayes, random forest, SVM, linear regression and K-Nearest Neighbour are used to build an Emotion classifier that will determine the emotion class of the text and compares the results using confusion matrix.

CHAPTER

1	INTRODUCTION	1
	1.1 Background	1
	1.2 Problem Statement	2
	1.3 Aim and Objective	2
	1.4 Scope of Project	2
2	LITERATURE REVIEW	3
	2.1 Intensity of emotions in tweets:	3
	2.2 Distinct Opinions of Social Media Users:	3
	2.3 Emotion Detection using Knowledge Base Approach on Twitter Data:	4
	2.4 Using Naïve Bayes as emotion classifier for text mining application of Twitter's users:	4
	2.5 Sentiment Analysis of Twitter Data Using Text Mining and Hybrid Classification Approach:	5

2.6	Deep convolutional neural networks for twitter Sentiment Analysis:	5
3	DESIGN AND METHODOLOGY	6
3.1	Process Model	6
3.2	System Requirements	7
3.2.1	Software Requirements	7
3.3	User Requirement	7
3.4	Method	7
3.4.1	Explanation	9
3.5	Text Pre-processing	10
3.5.1	Tokenization	10
3.5.2	Normalization	10
3.5.3	Converting into n grams	11
3.6	Comparative Research	11
3.7	Front End	11
4	IMPLMENTATION	12
4.1	Supervised Classification	12
4.1.1	Naïve Bayes	12
4.1.2	Support Vector Machine	13
4.1.3	Random Forest	15
4.1.4	Logistic Regression	15
4.1.5	K-Nearest Neighbour	16
5	RESULTS AND DISCUSSIONS	17
5.1	Accuracy	17
5.2	Precision, Recall and F1_Score	17
5.3	Confusion Matrix	18
5.4	Limitations	18
5.5	Analysis	19
5.6	Comparison of Different Classifiers	19
5.7	Testing	19

		x
	5.7.1 Unit Testing	19
	5.7.2 Regression Testing	20
	5.7.3 Smoke Testing	20
6	CONCLUSION AND RECOMMENDATIONS	21
	6.1 Future Work	21
	6.2 Future of Text Mining	21
	6.3 Conclusion	22
