

FINAL YEAR PROJECT REPORT

IOT BASED HOME AUTOMATION BY USING AI

**In fulfillment of the requirement
For degree of
BS (COMPUTER SCIENCES)**

By

**SYED HAIDER ZAMAN
M DANISH MUSTAFA
MOHAMMAD OMER**

**48399 BSCS
48489 BSCS
48537 BSCS**

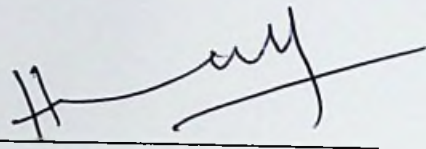

SUPERVISED

BY

**DR.GHULAM MUHAMMAD SHEIKH
BAHRIA UNIVERSITY (KARACHI CAMPUS)
FALL-2020**

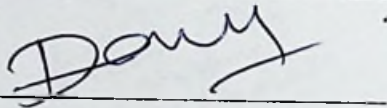

DECLARATION

We hereby declare that this project report is based on our original work except for citations and quotations which have been duly acknowledged. We also declare that it has not been previously and concurrently submitted for any other degree or award at Bahria University or other institutions.

Signature : 

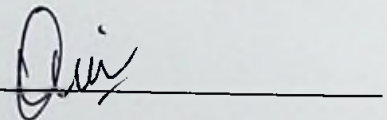

Name : Syed Haider Zaman

Reg No. : 48399

Signature : 

Name : M. Danish Mustafa

Reg No. : 48489

Signature : 

Name : Mohammad Omer

Reg No. : 48537

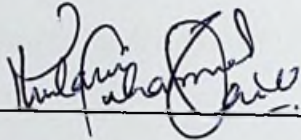

Date : 12-12-2020

APPROVAL FOR SUBMISSION

We certify that this project report entitled "IOT BASED HOME AUTOMATION BY USING AI" was prepared by SYED HAIDER ZAMAN, DANISH MUSTAFA and MOHAMMAD OMER has met the required standard for submission in partial fulfilment of the requirements for the award of Bachelor of Computer Science at Bahria University.

Approved by, Dr. Ghulam Muhammad Shaikh

Signature :

A handwritten signature in black ink, appearing to read 'Ghulam Muhammad Shaikh', is written over a horizontal line.

Supervisor : Dr Ghulam Muhammad Shaikh

Date : 12-12-2020

ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to our supervisor, Dr Ghulam Muhammad Shaikh for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given us encouragement.

IOT BASED HOME AUTOMATION BY USING AI

ABSTRACT

Automation deals with the management of electric/electronic devices with mobile/other application to provide easy to human for interacting these devices with ease . The principle of building an Automation is to achieve various advantages in a place and home and to improve lifestyle by using various technologies. Industrialists and scientists are attempting to work for productivity and reasonableness programmed frameworks to control various machines like lights, fans, AC dependent on the end user requirements. Automation makes an effective as well as a conservative utilization of power and lessens a large part of the wastage. Homes of the 21st century will turn out to be increasingly more self-controlled and robotized because of the solace it gives, particularly when utilized in a private home. A home Automation framework implies that permits clients to control electric apparatuses of differing sorts. Home Automation is the private expansion of building Automation and includes the control and robotization of lighting, heating, appliances, and security. Present-day frameworks for the most part comprise switches and sensors associated with a focal centre point some of the time called a "passage" from which the framework is controlled with a voice command. Home Automation frameworks are rapidly arising and getting well known these days on the planet, and its end clients are explicitly the disabled and older however because of their unpredictability and cost it isn't constantly acknowledged. By utilizing Raspberry Pi, we can assemble a home automation framework that is fit for operating these home gadgets consequently. The Raspberry Pi will fill in as an expert gadget through which the AI will impart and control the home machines. A home automation framework gives countless administrations which can comprehensively be characterized into the following four categories:

- A. Comfortable management of appliances
- B. Remote appliance control.
- C. Efficiently utilizing house resources
- D. Improving home security

Comfortable management incorporates both free administration of lights, apparatuses, and so forth Remote controlling services incorporate getting to gadgets from a far off area, gadgets, and setting them ON/OFF. Proficient utilization remembers running the home apparatuses for their streamlined settings. The last classification of administration incorporates those administrations which are utilized for making the home climate safe.
