ACKNOWLEDGEMENTS

I/We would like to thank everyone who had contributed to the successful completion of this project. I/We would like to express my gratitude to my research supervisor, Sir Muhammad Talha Alam for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, I/We would also like to express our gratitude to my/our loving parent and friends who had helped and given us encouragement.

WEB APPLICATION FOR ONLINE LEARNING

ABSTRACT

A Web Based E-Learning application is a platform that is an essential part of smart education. The main dare is to effortlessly incorporate the online learning method into the smart learning atmosphere according to the needs of students and provides many opportunities as compared to traditional learning.

Due to the vast enlargement of different technologies. today's education is not limited into the physical class. Lectures are the only way to impart knowledge but electronic means of learning are emerging. E-Learning makes learning easier and makes it possible to learn from anywhere, anytime, using the Internet. The services of online learning are based on a software structure that provides an easy access to all the best quality of teaching materials and makes them effortlessly accessible for all users over the internet at any place, any time whenever they are needed. This online learning system will have each user`s portal which is specially designed for their needs. The development and design of the online learning system is an essential aspect of the learning procedures because it represents that how well the system is used.

The applications for online learning requires the high level programming techniques in order to develop them and also the method of getting information or use them to develop larger applications is not only hard but it also requires a huge amount of money. It mainly helps to provide a user-friendly environment for potential students to gather up the knowledge at any educational level and fill the gaps between teachers and students.
