ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, Mr. M. Noman Khalid for his invaluable advice, guidance, and his enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

AN APPROACH TO ENHANCE HEALTHCARE PLATFORM THAT SUPPORT HEALTHCARE PROVIDERS AND RECIPIENTS

ABSTRACT

This project aims to define the design and implementation of a platform to manage health data flow and exchange among all health facilities, institutions, and other entities to communicate using technology and patients can have more control and awareness over their medical data. The system is a comprehensive distributed application represented by a set of components, each of which is connected with a distinct element of the system, such as patient medical records handled by general practitioners and their auxiliary personnel, financial records that keep track of and handle the expenses of patient interactions laboratory records, which maintain track of the results of the tests performed on patients and may be obtained at any time, management of drug records and availability that interacts with pharmacies and pharmaceutical inventories, emergency health system interacts with the patient medical records in order to accomplish quicker reactions in order to preserve the patient's life. human resources oversee managing information on the staff of the health information system. The work done consists of design and implementation of a system that comply all health services effectively.

CHAPTER

Contents

CHAPTER 1	1
-----------------	----------

1. INTRODUCTION

- 1.1. Background
- 1.2. Problem Statement
- 1.3. Aims And Objectives
- 1.4. Scope Of Project

CHAPTER 2	2
-----------------	----------

2. LITERATURE REVIEW

- 2.1. Global Background

2.2.	Tele Health	
2.3.	Tele Medicine	
2.4.	E-Pharmacy	
2.5.	Patient Health Record	
2.6.	Electronic Health Record	
2.7.	Electronic Medical Record	
2.8.	Hospital Information System	
2.9.	Types of Doctors	
2.10.	Existing Application Comparison	
2.10.1.	Shifa4U	
2.10.2.	Icliniq	
2.10.3.	Ringadoctor	
2.10.4.	Marham	
CHAPTER 3	3

3. DESIGN AND METHADODOLOGY

3.1.	Design	
3.2.	Methodology	
3.3.	Health Information Management System	
3.4.	Module of health care app	
3.4.1.	Patient Registration management	
3.4.2.	Appointment and Scheduling management	
3.4.3.	Lab/Diagnostic management	
3.4.4.	E-Pharmacy management	
3.4.5.	Inventory management	
3.4.6.	Ambulance management	
3.4.7.	Blood Bank management	
3.4.8.	Consultancy management	
3.4.9.	Medical Data	
3.4.10.	Web Portal	
3.4.11.	Health Blog	
3.4.12.	Mobile Application	
3.5.	Use Case	
CHAPTER 4	4

4. IMPLEMENTATION	
4.1. Software Development	
4.2. User Interface	
4.3. Database	
4.4. Controllers	
4.5. Security	
CHAPTER 5	5
5. RESULT AND DISCUSSION	
5.1. Results	
5.2. Discussion	
CHAPTER 6	6
6. TESTING	
6.1. Testing	
6.1.1. Types Of Testing	
6.1.1.1. White Box Testing	
6.1.1.2. Black Box Testing	
6.2. Test Plan and Test Cases	
6.2.1. Login Module	
6.2.2. Add New User	
6.2.3. Test Make An Appointment	
6.3. Acceptance Testing	
6.4. Summary	
CHAPTER 7	6
7. CONCLUSION AND RECOMMENDATION	
7.1. Introduction	
7.2. Work Carried Out	
7.3. Findings	
7.4. Problem Encountered	
7.5. Lesson Learnt	
7.6. Future Work
