ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to our research supervisor, Miss Fatima Bashir for her invaluable advice, guidance, and her enormous patience throughout the development of the project.

In addition, we would like to express my gratitude to our loving Parent and friends who had helped and given me encouragement.

PIC AND DROP GOODS SAMAAN SAFAARI

ABSTRACT

Pick and Drop goods is a Mobile-based application that aims to provide an easy and effective way of picking up and dropping off your goods/furniture/electronic items and will allow the service deliver providers to give their best possible fair quotation to shift your goods, so you can choose the service in least appropriately. Our **PICK & DROP GOODS** Project is mainly divided into three Domains. Web-based portal for Admin and two Mobile-based Applications for Drivers and Users. Driver can be registered by Admin after verification of documents and can start his journey on our application were as User will download the application from App-store and can easily use it as per his need. The most amazing feature of the project is bidding where driver and user can communicate via live chat for cost bargain. Cost is basically depending on factors like distance, fuel consume, cc of engine and weight of parcel.

As we understand that managing personal work is a big challenge in day-to-day life and it also adds stress to once life, this Mobile application will be a perfect solution for fulfilling day-to-day ordinary tasks, which are mandatory to complete. The Samaan Safaari service would be a quick and easy solution for the online businesses as well.
