ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, **SIR JAWAD BHUTTA** for his invaluable advice, guidance, and his/her enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

SECURING DATA LEAKS VIA SQL INJECTION ON AN E-COMMERCE WEBSITE

ABSTRACT

Nowadays e-commerce websites are very popular for online shopping in this pandemic. While in this digital world the online security breach is a big threat to the real world as it can be very dangerous for a person or any organization who get attacked by these hackers. A lot of users get cash out of their Credit Cards while ordering online and they get access of user details. Even though technology has advanced significantly in recent years, hackers can still exploit security flaws to do SQL injections. Hackers can use a variety of methods to accomplish SQL injections, and there are numerous ways to prevent SQL injections from occurring. The vulnerability to SQL injections is significant and it pose a significant threat to web based applications since hackers may quickly enter their system and access whatever data and information they choose, at any time and from any location. The project is based on the prevention of **SQL injection Queries via secured Database and AES**.

CHAPTER'S

3

1	INTR	ODUCTION	13-15
	1.1	Background	13-14
	1.2	Problem Statements	14
	1.3	Aims and Objectives	14-15
	1.4	Scope of Project	15
2	LITE	RATURE REVIEW	17-21
	2.1	Sql Injection Implementation/Prevention	16-17
	2.2	E-Commerce Web Development	17-18
		2.2.1 Php Scripting Language	17
		2.2.2 Mysql Database, Js, Css & Html	17-18
	2.3	Sql Injection Implementation/Prevention	18-20

DESIGN AND METHODOLOGY		22-29
3.1	Design	22

8

	3.1.1	System Block Diagram	22-23
	3.1.2	Tools & Languages	23
	3.1.3	Design of the study	23
3.2	Projec	t Methodology	24
3.3	Modu	les	24-25
	3.3.1	Admin Login	25
	3.3.2	User login & Registration	25
	3.3.3	MySQL DataBase	25
3.4	Workflo	w of The Project	25-26
3.5	Sql Injec	tions & its Types	26-27
	3.5.1	In-Band SQLI	27
	3.5.2	Infarantial (Blind) SQLI	27
	3.5.3	Out-Of-Band SQLI	27
3.6	AES (A	Advanced Encryption System)	29

4

IMPLEMENTATION

30-46

4.1	Installation of Web Server	30
4.2	Creating Structure	30
4.3	Adding Additional Features	31-36
4.4	Admin Portal Overhaul	36-40
4.5	Customer Product Selection & Payment	40-41
4.6	Database Connectivity	41
4.7	Basic Input Validation Check	41
4.8	Parameterization	41-43
4.9	Encryption Scheme	43-44
4.10	Additional Measures	44-46

5 RESULT & TESTING

47-53
