## ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, Mr Jawad Ahmed Bhutta for his invaluable advice, guidance and his enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

# WEB & MOBILE BASED ONLINE ORGANIZATION EMPLOYEES PAY SHEET MANAGEMENT SYSTEM

## ABSTRACT

This system is made with the combination of Web and App Integrated mutually with the same Database. For This system works as a framework for HR to make employees pays while going through all terminologies like presence, absence, late, leaves, loan, taxes, penalties etc. once the pay is debited in employee's account so we provide our employees with the app where they can see their pay details with the pay slip which will save their time to go to bank and waste their time in asking of pay slip. All this task may be depended on the individual's working pace. All The employees ought to synchronize the paper work manually with the aid of speaking every different. This paper task takes numerous time and calls for greater space to save accurately and all of the additional resources required to make sure the protection. In this system, there is surety or reliability as the humans are likely to make an error. This report justifies all the additional ideas and features of our system and our highlights effort to reduce manual tactics in an organization's Pay rolling process that whether it's an HR, CEO and employee. We hope to provide flexibility to everyone related with this process. The unique feature of this system are a Mobile application which is solely dedicated for employee where he/she will monitor pay sheet detail and other relative things and employee leave request handling from app to web without using any third party resrouce like mail, sim message etc. Employee will send leave request from mobile application which will have pending status until it is approved from web application by HR and a record will be occur in both Web application and mobile application.
