ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express our gratitude to our research supervisor, Bilal Muhammad Iqbal for his invaluable advice, guidance, and his enormous patience throughout the development of the research.

In addition, we would also like to express our gratitude to our loving parents and friends who had helped and given us encouragement.

IOT BASED SMART GLASSES FOR BLIND

ABSTRACT

Blind mobility is one of the major challenges encountered by visually impaired persons in their daily lives. Their life and activities are greatly restricted by loss of eyesight. They normally travel using blind navigation system or by their accumulated memories in their long-term exploration. The main objective of the present work is to develop a low cost, reliable, portable, user friendly, low power and robust solution for smooth navigation. This (Smart Glasses for Blind People), as meant are the glasses are for visually impaired people. It has an in-built sensor in it which spreads ultrasonic waves in the direction the person is going by scanning at most 5-6 meters. As soon as the obstacle is detected, the sensor detects it and sends it to the device which generates an automated voice in the earphone connected to the person's ear. By which it will become very easy for the person to know what is in front of him and he will be save from getting harm from any sort of danger Infront of him..

TABLE OF CONTENTS

DECLARATION	i
APPROVAL FOR SUBMISSION	ii
ACKNOWLEDGEMENTS	iv
ABSTRACT	v
TABLE OF CONTENTS	vi
LIST OF TABLES	vix
LIST OF FIGURES	x
CHAPTERS	
CHAPTER 1	12
1 INTRODUCTION	12
1.1 Background	12
1.2 Problem Statements	12
1.3 Aims and Objectives	13
1.4 Scope of Project	13
CHAPTER 2	14
2 LITERATURE REVIEW	14
2.1 Text Direction	14
2.2 Image Processing	14
2.3 Work	15
2.4 Project Specification:	15

CHAPTER 3		16
3	DESIGN AND METHODOLOGY	16
3.1	Technical	16
3.2	Physical	16
3.2.1	Sensor	16
3.2.2	Headphones	18
3.2.3	Controller	19
3.2.4	Jumpers	19
3.2.5	Glasses	20
3.2.6	Raspberry Pi Camera	20
3.3	Requirements Analysis:	22
3.3.1	Requirements Specification	22
3.3.2	Constraints:	26
3.4	System Design:	29
3.4.1	Conceptual Design:	29
3.4.2	Hardware Design:	32
3.4.3	Design Methodology	32
CHAPTER 4		34
	IMPLEMENTATION	34
4.1	Installing Raspbian Stretch Operating System:	34
4.2	Installing OpenCV 4 Libraries	34
4.3	How to set Wi-Fi on Raspberry Pi Model B+:	38
4.4	GPIO (General Purpose Input/Output):	38
4.5	Importing Ultrasonic Sensor:	39
4.6	Setting Up the Button	40
4.7	Taking Picture Setting Up:	41
4.8	Setup a Raspberry Pi RFID RC522:	42
4.9	Convert text to voice:	45

CHAPTER 5	46
TESTING & EVALUATION	46
5.1 Test Ultrasonic Sensor:	46
5.2 Test RFID Sensor:	47
5.3 System Testing:	47
5.3.1 Test 1: Taking picture:	48
5.3.2 Test 2: Text detection and Recognition:	49
5.3.3 Test 3: Text to Voice:	49
5.3.4 Test 4: Text Translation:	50
5.3.5 Test 5: ID's identification by RFID:	51
CHAPTER 6	53
CONCLUSION & FUTURE WORK	53
6.1 Conclusion	53
6.2 Future Work	53
