ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express our gratitude to the research supervisor, Madam AmnaIftikhar for her invaluable advice, guidance, and her enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parents and friends who had helped and given us the needed encouragement.

BLOCKCHAIN BASED NGO

ABSTRACT

A technology that has the most impact in almost all fields in the current era is blockchain. But some people still confuse blockchain with bitcoin, however that is not the same thing. Bitcoin is one of the many application that make use of the blockchain technology. The data in this era is rapidly increasing at breakneck speed. According to some research, only 20% of the world's data has been collected and stored in the past few years. While the data is becoming centralized, there are many growing concerns about user privacy. People have little to no more control over their data stored and how it is used. Thus there have been numerous efforts to address users' privacy concerns lately. This led to the invention of blockchain, without a centralized regulatory and publicly accessed ledger. In this paper we will be discussing about the impact of Blockchain on NGOs and different aspects of society.

ABSTRACT	vii
TABLE OF CONTENTS	viii
LIST OF FIGURES	ix

CHAPTER

1 INTRODUCTION	14
1.1 Problem Statement	15
1.2 Background	16
1.2.1 Permissionless Blockchains	16
1.2.2 Permissioned Blockchains	17
1.3 Aims and Objectives	17
1.4 Outcome	17
1.5 Framework	18
1.6 Networking in Blockchain	19
2 LITERATURE REVIEW	20
2.1 Background	20
2.2 Comparison table with existing study	22
2.3 Related work	23
2.3.1 Blockchain in cloud computing	23
2.3.2 Distributed computing and blockchain	24
2.3.3 Blockchain in ngo	24

3 PROJECT TERMINOLOGIES	26
3.1 WEB 3.0	26
3.1.1 WEB 3.0	26
3.1.2 WEB 2.0	26
3.1.3 WEB 1.0	26
3.1.4 WEB 3.0 & WEB 2.0	27
3.2 Effects of Web 3.0	28
3.3 Metamask	29
3.4 Tools and Technologies	30
3.4.1 Bitcoin	30
3.4.2 Ethereum	31
3.5 Solidity	33
3.5.1 Structure of a Contract	33
3.5.2 Solidity Types	34
3.5.3 Contract Types	35
3.5.4 Solidity VS Other languages use to create smart contract	39
3.5.4.1 Rust	39
3.5.4.2 Javascript	39
3.5.4.3 Yul	40
3.6 Contracts	41
3.6.1 How Contracts create?	41
3.7 Visibility and Getters	41
3.7.1 State variable visibility	41
3.7.2 Getter Functions	41
3.8 Function Modifiers	42
3.9 Constant and Immutable state variables	42
3.10 Functions	42
3.11 Return Variables	42
3.12 Pure Functions	42
3.13 Special Functions	43
3.13.1 Receive Ether Functions	43

3.13.2 Fallback Function	43
3.13.3 Function overloading	43
3.14 Events	43
3.15 Errors and Revert Statement	43
3.16 Inheritance	43
3.17 Function Overriding	44
3.18 Modifiers Overriding	44
3.19 Constructor	44
3.20 Abstract Contracts	44
3.21 Interfaces	44
3.22 Libraries	44
4 PROPOSED METHODOLOGIES	45
4.1 Project Methodology	45
4.2 Blockchain Methodology	45
5 IMPLMENTATION	46
5.1 MODULE DEVELOPMENT	46
5.2 GUI AND SOURCECODE	48
5.2.1 SOURCECODE	48
5.2.2 GUI	57
6 TESTING AND EVALUATION	64
6.1 Test Plan	64
6.2 Test Module	64
6.3 Test Cases and Evaluation	65
7 CONCLUSION AND FUTUER WORK	68
7.1 Future Work	68
7.1.1 DETECTION TECHNOLOGY	68
7.1.2 IDENTITY AND REPUTATION BLOCKCHAIN	68
