Management Sciences

Acknowledgement

Firstly we would like to thanks Allah Almighty for giving us the power to complete this project, we would like to thank, recognize the help and guidance of our supervisor **Sir Kashif Ali Shigri** supervisor, without him the project would not have been completed. The information and guidance on how to construct and complete the project. Our friend were also a help in need and their cooperation guided us in overcoming many issues specially Awais Bilal, Ameer Hamza, Murtaza Hassan, Umar Khattak, Abubakr and Hasnain Tahir. We are also grateful to the publication resourcesand lastly the company for providing us what information we needed.

Abstract

This project provide us the confirmation to a well-known characteristic called the warehouse management. Basically the face by the company Magic tech Pakistan was the low level of management in warehousing in their supply chain. The information collected is by visiting the company, the warehouse and interviewing the personnel on many occasion. The main theme in doing this project is to analyze the risk and challenges faced by magic tech Pakistan. To analyze the problem faced in warehouse management system.

While being done with the analysis we yielded this solution and concluded to provide and consult them the management of warehousing and to overcome the risk and challenges faced by the company. We consulted them the proper management of the warehouse through which they can efficiently manage the stocking and well manage their inventory.

By applying the options and the suggestions given by us to the company can bring efficiency and effectiveness in the warehousing management system. It can lower and exclude the factor of risk and challenges being faced by the company.
