Acknowledgments

We the students of Bahria University Karachi Campus (Computer Science and Engineering Department) who have made the project Agile Manager Network acknowledge with all the sincerity of heart, this Final Year Project Report would have never been materialized and would never have seen this the day without the valuable contributions of so many persons, to each of whom we feel heart-felt pleasure to pay our due gratitude coupled with appreciation.

First and foremost, we would like to pay great gratitude and high regards to our Final Year Project Supervisor and guide, Engineer Tazeen Muzammil for her persistent support, constant encouragement and thoughtful discussions. She has always very kindly provided us with a friendly atmosphere and ever-benefitting academic guidance. We would like to present a word of gratitude to her for all her counseling, effort, time, care and attention that she bestowed upon us. Our success is mainly due to her interest in us and our hard work. She not only delivered us book knowledge but also taught us moral lessons which will guide us in every walk of life.

Secondly, we would like to pay our regards to Engineer Usman Waheed. He guided us in our whole academic period with his experience and helped us out in our Project and Report.

Abstract

The aim of behind Agile Manager is to provides Project management tools that will help better monitor the status of ongoing Projects, releases and any problem that could potentially result in the delay of the project .Agile manager has many competitive advantages in a number of areas in terms of providing real time feedback on any accomplishment and even loss so that measures could be taken to overcome them. Agile manager focuses on scrum to manage projects as scrum is the most widely used agile framework, starting from creating backlogs of user stories, creating releases that will accomplish one or more of these user stories .Short sprint cycles provide fast delivery of features followed by a retrospective to analyze the entire sprint cycle. Agile manager brings the entire process of scrum together and provides tools to monitor the status of every phase such as burn down chart, Gant chart
