Supervised by

Engineer Hina Shakir

Bahria University (Karachi Campus)

2012

Acknowledgments

We the students of Bahria University Karachi Campus (Computer Science and Engineering Department) who have made the project Soft Cash acknowledge with all the sincerity of heart, that this Final Year Project Report would have never been materialized and would never have seen this the day without the valuable contributions of so many persons, to each of whom we feel heart-felt pleasure to pay our due gratitude coupled with appreciation.

First and foremost, we would like to pay great gratitude and high regards to our Final Year Project Supervisor and guide Engineer Hina Shakir, for her persistent support, constant encouragement and thoughtful discussions. She has always very kindly provided us with a friendly atmosphere and ever-benefitting academic guidance. We would like to present a word of gratitude to her for all her counsel, effort, time, care and attention that she bestowed upon the two of us. Our success is mainly due to her interest in us and her labor. She not only delivered us book knowledge but also taught us moral lessons which will guide us in the walk of life.

Secondly, we would like to pay our regards to Professor Usman Waheed, a senior most faculty at Bahria University. He guided us in our whole academic period with his experience and help us out in completion our Project and Report.

Abstract

Our project Soft Cash is a financial application. Our idea behind this project is empty pocket except our phone. It aims to digitize everything in your pockets in coming years by collapsing all that paper, plastic and metal into one device: The Smartphone.

Smartphone have replaced many other once-common tools, from GPS devices to handheld gaming consoles, point-and-shoot cameras, calendars, notebooks, newspapers and portable music players. Now they're conquering new territory, most notably the wallet. Our idea is of using the Smartphone as Cash bringing your wallet in one application, i.e. after shopping, you will receive receipt from merchant on your screen and pay bill through our application using our payment channel just like you do payment from your credit/debit cards .(Other payment facilities and features are included in our future scope).

The Soft Cash is a Smartphone application which enables the users to carry out the payment process in secure manner after shopping. Soft Cash aims to protect merchants and consumers from fraud associated with credit card transactions. With confirmations messages from both merchant's and consumer's end, both the parties will be well informed by the transaction status on the right time, the time of the transaction.

RSA session keys will be provided and kept in secret with all the parties using the soft cash service. The will help protect passwords and vital information on all ends of the system. Afterwards consumers can rate the merchant for future transactions and transactions of other parties.

Products can be viewed from the merchant's database by using the QR code reader technique. The merchants can create these QR code using the merchants' application provided by soft cash.

ACKNOWLEDGMENTS 1

ABSTRACT..... 2

CHAPTER 1 9

 INTRODUCTION..... 9

 1.1 *Motivation*..... 9

 1.2 *Aims and Objectives* 10

 1.3 *Class Diagram*..... 11

 1.4 *Report Structure* 12

 1.4.1 *Introduction* 12

 1.4.2 *Background and Literature Review*..... 12

 1.4.3 *Methods, Assumptions and Procedures*..... 12

 1.4.4 *Analysis and Design* 13

 1.4.5 *Implementation* 13

 1.4.6 *Testing* 13

 1.4.7 *Discussion*..... 13

 1.4.8 *Future Work*..... 13

CHAPTER 2..... 14

 2.1 *Background and Literature Review*..... 14

CHAPTER 3..... 17

 METHODS, ASSUMPTIONS AND PROCEDURES 17

 3.1 *Methods and Techniques* 17

 3.2 *Feasibility Reports*..... 18

 3.2.1 *Operational Feasibility*..... 18

 3.2.2 *Technical Feasibility* 20

 3.2.3 *Economic Feasibility*..... 23

CHAPTER 4	24
ANALYSIS AND DESIGN	24
4.1 <i>RSA Algorithm</i>	24
4.2 <i>Comparison of Asymmetric and Symmetric key algorithms (RSA Compared to AES)</i> 26	
4.3 <i>Context Diagram</i>	27
4.4 <i>Actor Use Case Diagram</i>	28
4.5 <i>Analysis Use Cases, Design Use Cases and Object Diagrams</i>	29
CHAPTER 5	37
IMPLEMENTATION	37
5.1 <i>Merchant Database Diagram</i>	37
5.2 <i>Architecture Diagram</i>	39
5.3 <i>Component Diagram</i>	41
5.4 <i>Deployment Diagram</i>	42
CHAPTER 6	43
TESTING	43
6.1 <i>Black Box Testing for Merchant's Application</i>	43
6.2 <i>Black Box Testing for Client's Application</i>	50
CHAPTER 7	59
DISCUSSION.....	59
7.1 <i>Progression of Project</i>	59
CHAPTER 8	60
FUTURE WORK.....	60
8.1 <i>Suggestions and Recommendations</i>	60

CHAPTER 9	61
APPENDICES	61
9.1 <i>Appendix A : Use Cases</i>	61
9.2 <i>Appendix B : Black BoxTesting</i>	72
9.2.1 <i>Graphical User Interface of Soft Cash Merchant's Application</i>	72
9.2.2 <i>Graphical User Interface for Soft Cash Windows Phone Application</i>	102
CHAPTER 10	145
REFERENCES	145
