2014**

ACKNOWLEDGEMENT

All praises and thanks to Al-Mighty “Allah”, the most merciful, the most gracious, the source of knowledge and wisdom endowed to mankind, who conferred us with the power of mind and capability to take this project to the exciting ocean of knowledge. All respects are for our most beloved Holy Prophet “Hazrat Muhammad (Peace Be upon Him)”, who is forever a torch of guidance for humanity as whole.

Acknowledgement is due to Faculty of Engineering Sciences and Technology for support of this Project.

We would like to express our gratitude to our project supervisor, Engr. Burhan Ahmed for his guidance, support and sharing his experiences with us regarding project. Due to his dynamic supervision we were able to complete this project. His tremendous guidance, invaluable suggestions, enlightening comments and constructive criticism always kept our spirits up. It was not so easy to come up with the challenge but the firm determination, continuous hard work and invincible will of our zealous group members we brought this report for you.

ABSTRACT

Developing countries are in critical energy crisis. Pakistan spends almost 7 billion US\$ on import of fossil Fuels annually to congregate its energy needs. The renewable and sustainable energy resources are best Substitute to the conventional fuels and energy sources. Pakistan takes the opportunity to have almost 159 million animals producing almost 652 million kg of manure daily from cattle and buffalo only; that can be used to generate 16.3 million m³ biogas per day and 21 million tons of bio fertilizer per year.

Biogas from anaerobic digestion of biological wastes is a renewable energy resource. Typical biogas contains 50-65% methane (CH₄), 30-45% carbon dioxide (CO₂), moisture and traces of hydrogen sulphide (H₂S) and can be used for power generation through internal combustion engine.

What we are trying to make is fully automated biogas plant that could be one step further in the research work that have been done already. So, that our finished product can be marketed and generate income rather than spending millions of dollars.

The need of a national policy is imperative to bring this technology at farmer's doorstep.

TABLE OF CONTENTS

CHAPTER 1 : INTRODUCTION	1
1.1 WHAT IS BIOGAS	1
1.2 WHAT BIOGAS CAN DO	1
1.3 BIO GAS PLANTS	1
1.4 BIOGAS PLANTS FOR COMMUNITY	2
CHAPTER 2 : BACKGROUND AND LITERATURE REVIEW.....	3
2.1 HISTORY OF BIOGAS PLANT IN PAKISTAN	3
CHAPTER 3 : AIM AND STATEMENT OF PROBLEMS.....	4
3.1 OBJECTIVES OF THE PROJECT	4
3.2 SCOPE OF THE PROJECT.....	5
3.2.1 LOW COST ENERGY	5
3.2.2 SANITATION	5
3.2.3 POLLUTION CONTROL	6
3.2.4 EMPLOYMENT GENERATION	6
3.2.5 MAKE GOOD FERTILIZERS	6
3.2.6 REDUCE DRUDGER	6
3.3 RAW BIO GAS HOLDERS	6

CHAPTER 4 : ANALYSIS AND DESIGN.....	7
4.1 BLOCK DIAGRAM OF THE SYSTEM	7
4.2 SENSORS	8
4.2.1 LIQUID LEVEL CONTROL SWITCH	8
4.2.2 LOAD CELL	9
4.3 DC MOTOR	10
4.3.1 MODEL EXPLANATION	11
4.3.2 USAGE	11
4.3.3 TECHNICAL DATA	12
4.4 SOLENOID VALVES	12
4.5 DRUMS	13
4.6 WATER TANK	14
4.7 HMI (HUMAN MACHINE INTERFACE)	15
4.8 PLC (PROGRAMMABLE LOGIC CONTROLLER)	16
4.8.1 PROGRAMMABLE	16
4.8.2 LOGIC	16
4.8.3 CONTROLLER	16
4.8.4 HISTORY	17
4.8.5 PLC CONTAINS	17
4.8.6 RELAY	17
4.8.7 TIMER	18

4.8.8 COUNTER	18
4.8.9 DESCRIPTION	18
4.8.10 CPU	19
4.8.11 MEMORY	19
4.8.12 I/O SECTION	19
4.8.13 O/P SECTION	19
4.8.14 POWER SUPPLY	19
4.8.15 PLC LANGUAGES	19
4.8.16 DELTA PLC	20
CHAPTER 5 : IMPLEMENTATION.....	21
5.1 REQUIRED HARDWARE AND SOFTWARE	22
5.1.1 HARDWARE	22
5.1.2 SOFTWARE	22
5.2 LIST OF COMPONENTS TO BE USED IN THE PROJECT	22
CHAPTER 6 : TESTING	24
6.1 PROGRAMMING DONE IN THE PROJECT.....	24
6.2 HMI PROGRAMMING.....	24
6.3 DELTA PLC PROGRAMMING.....	29
CHAPTER 7 : RESULTS.....	31
7.1 DATA COLLECTED	31

CHAPTER 8 : DISCUSSION	34
 8.1 PROTOTYPE DEMONSTRATION OF THE PROJECT	34
CHAPTER 9 : CONCULUTION	36
CHAPTER 10 : FUTURE WORK	37
 10.1 APPLICATIONS OF THE PROJECT	37
REFERENCES	38
APPENDIX A.....	39
