FINAL YEAR PROJECT REPORT

UMV Controlling by ANDROID using WIFI

By

Raheel Rehman	19216	BEE (Telecom)
Syed Wajahat Ali Shah	19223	BEE (Telecom)
Syed M.Abbas Hussain Shah	19222	BEE (Telecom)

Supervised by

Engr. Hina Shakir

Bahria University (Karachi Campus)

Batch 2009-2010

Acknowledgments

We thank the Almighty Allah for blessing us with the accomplishment of our final year project and blessings us with the will, the strength and the opportunity face all challenges and finally helping us in completing and achieving our goal.

I would also like to be immensely thankful to our project co-coordinator Engr Burhan Ahmed and our project supervisor Ma'am Hina Shakir ,for guiding us through out the project phases. I show my sincere gratitude to Dr. Haroon Rashid ,our project committee head for helping us improve our project my making beneficial amendments to our project and showing us a more brighter prospective of how to improve and polish our project.

Last but certainly not the least, to our parents who provided full financial support in helping us develop our project from scratch.

ABSTRACT

Automation is the use of machines, control systems and integrated technologies to optimize productivity in the delivery of services. The incentive for applying automation is to increase the productivity by a substantial amount. With wireless data acquisition and communication with the machinery the ever growing scope of industrialization automation is one step beyond that of mechanization. And all this technology is implemented using the standard wifi communication making it easier to apply and to utilize in many domains.

ABSTRACT 4

TABLE OF CONTENT ..... ERROR! BOOKMARK NOT DEFINED.

1-INTRODUCTION 9

2-BACKGROUND AND LITERATURE OVERVIEW: 10

2.1-OPEN VERSUS BRANDED 10

2.2- ANDROID OPERATING SYSTEM 10

2.3- Open Source Coding 11

2.4- DESCRIPTION OF TCP/IP PROTOCOL 11

2.4.1- NETWORK PACKET 11

2.5- OSI LAYER MODEL 12

2.5.1-APPLICATION LAYER: 13

2.5.2- TRANSPORT LAYER 13

2.5.3- NETWORK LAYER 13

2.5.4- DATA LINK LAYER 13

2.6- 802.11G(WIFI) 14

2.7-ARDUINO ATTACHMENTS : 14

2.7.1-CU-HEAD WIFI SHIELD VERSION 2.0 14

2.7.2-ARDUINO UNO- OVERVIEW 16

2.8-INTRODUCTION TO ECLIPSE 18

2.8.1 - STEPS TO GET STARTED 19

2.8.2-UNDERSTANDING THE ANDROID TERMINOLOGIES 19

2.8.3-CREATING YOUR ANDRIOD VIRTUAL DEVICE 20

2.8.4- GETTING FAMILIAR WITH THE ANDRIOD PROJECT 21

2.8.5-INITIATING YOUR NEWLY DEVELOPED ANDROID APPLICATION: 27

2.8.5.1-FIRST START YOUR EMULATOR 28

2.8.5.2- Start application 28

2.8.5.3- Emulator Control 29

2.8.5.4-Android App: 29

2.8.5.5- Cross-App tasks routines : 30

2.8.5.6-THE ANDROID APP COMPONENTS: 30

2.8.5.6.1- SERVICES 30

2.8.5.6.2-ACTIVITIES 30
2.8.5.6.3-Content providers 31
2.8.5.6.4- Broadcast Receiver 31
2.8.5.7- Android Widgets 31
2.8.5.8-Android manifest file(The AndroidManifest.xml) 31
2.8.6- Handling of the application lifecycle event 31
2.8.7- Resources 32
2.8.7.1 –Drawables : 32
2.8.7.2 – Simple Values: 32
2.8.7.3- Layouts : 33
2.8.7.4- Themes : 33
2.8.7.4- Animations : 33
2.8.7.5- Raw data : 33
2.8.7.6- Menus : 33
2.8.8- ASSETS 33
2.8.9- Attributes 34
2.8.10- Android Layout Manager 34
2.8.10.1- Available Layout Manager 34
2.8.10.2- Frame Layout 35
2.8.10.3- Linear Layout Manager: 36
2.8.10.4- Android Grid Layout 36
2.8.11-Android App Deployment using the Eclipse : 37
2.8.12- Next step of Exporting your developed Android Application 38
2.8.13- Utilization of External Sources 39
2.8.14- The Famous Google Play 39
2.8.15-CLOSING OF ECLIPSE: 40
2.9-THE ARDUINO PC SOFTWARE VERSION 1.0.5 40
2.9.1-Opening Window: 41
2.9.2-Standard Tools: 42
2.9.3-The Sketchbook Concept: 43
2.9.4-Libraries: 43
2.9.5-Additional Hardware Compatibility : 43
2.9.6-Serial Monitor: 44
2.9.7-Language Support: 44
2.9.8- Boards 45

2.9.9- Software Window.....47
2.9.10- Open Source Codes For Small Projects.....48
2.9.11- Closing Arduino.....49
3- AIM AND STATEMENT OF THE PROBLEM.....49
3.1- Original Scope of Our Final Year Project.....49
3.2- Problems Regarding the University Administration..... 50
3.3- Co-Ordinator's Lack Of Knowledge About Our Project.....50
3.4- Problems Faced During Development.....51
3.5- Problems With The Equipment.....51
3.5.1- Troubleshooting.....52
4- PROJECT OVERVIEW.....53
4.1- Project At A Glance.....54
5- ANALYSIS AND DESIGN.....55
5.1- Block Diagram.....56
5.2- Flowcharts.....57
6- PROJECT IMPLEMENTATION.....58
7- RESULT.....64
8- COST ANALYSIS.....65
9- DISCUSSION.....66
10- CONCLUSION.....67
11- FUTURE WORK.....68
11.1- Our Plans For Our Projects.....69
12- REFERENCES.....71
13- APPENDICES.....72
13.1- Date Sheets.....72
13.1.1- L293B Motor Driver IC.....72
13.1.2- Arduino UNO R3 Schematic.....74
13.2-Coding.....75
