2010-2011

Acknowledgments

First and foremost, we would like to thank Almighty Allah for His grace that we completed our project “Digital PID temperature controller- an implementation in FPGA”.

We are also thankful to our supervisor Mr. Salman Zafar for his inspiration and continuous support. He is always willing to listen, support, and give insightful comments. Our project would not have been possible without his support and guidance.

We are thankful to our friends for their cooperation and support during the time of studies. We are also thankful to our parents for their love and patience.

Abstract

Our project is all about the design, the synthesis, and the implementation of digital PID temperature controller in Xilinx FPGA (Field Programmable Gate Array) Spartan 3. We have used Verilog language to design PID controller.

PID temperature controller has been widely used in many applications like industries of packaging, food processing, and plastic making industry. In our project, we have designed PID controller to control temperature of water tank.

In many industrial applications, FPGA based PID controller is more useful over the other controller systems like microcontroller etc. Power, compactness, and flexibility of FPGA based PID controller can be useful in controlling. FPGA lets the implementation of parallel processing. We have implemented Verilog model of PID controller implemented on Spartan 3 FPGA. It consumed 548 numbers of slices, 975 numbers of LUTs and 29 numbers of bonded IOBs.

Contents

ACKNOWLEDGMENTS	IV
ABSTRACT	V
TABLE OF CONTENTS	VI
1. INTRODUCTION.....	2
1.1 OBJECTIVE OF PROJECT.....	2
1.1.1 General Objective of Project	2
1.1.2 Specific Objective of Project.....	2
1.2 TOP LEVEL BLOCK DIAGRAM OF PROJECT.....	3
1.3 ORGANIZATION OF REPORT	3
2. BACKGROUND AND LITERATURE REVIEW	6
2.1 CONTROL SYSTEM	6
2.2 TYPES OF CONTROL SYSTEM	6
2.2.1 Open Loop Control System.....	6
2.2.2 Close Loop Control System.....	7
2.3 NEED OF FEED BACK CONTROL.....	8
2.4 TYPES OF CONTROLLERS	8
2.4.1 P Controller.....	8
2.4.2 PI Controller.....	9
2.4.3 PD Controller	9
2.4.4 PID Controller.....	10
2.6.1 ADVANTAGES OF FPGA	15
3 AIM AND STATEMENT OF PROBLEM.....	18
3.1. PROBLEM STATEMENT	18
3.2. SCOPE OF PROJECT.....	18
3.3. DOMAIN OF PROJECT	18
3.4. AIM AND STATEMENT OF PROBLEM	18
3.5. INDUSTRIAL APPLICATIONS OF TEMPERATURE CONTROLLER	19
3.5.1. Heat Treatment	19
3.5.2. Packaging	19
3.5.3. Plastics.....	19
3.5.4. Health Care.....	19
3.5.5. Food Processing	19
4. ANALYSIS AND DESIGN	21
4.1. REQUIREMENT ANALYSIS	21
4.2. COLLECTING REQUIREMENTS	21
4.2.1. Determining Testability	21
4.3. IDENTIFYING THE TYPES OF REQUIREMENTS	21
4.4. REVIEWING THE REQUIREMENTS	22
4.5. RISK MANAGEMENT PLAN.....	22

4.5.1.	<i>Types of Risks</i>	22
4.5.2.	<i>Identification of Risks</i>	22
4.6.	OVERVIEW OF MAJOR RISKS AND MANAGEMENT.....	22
4.7.	DESIGN	22
4.8.	XILINX ISE OVERVIEW	23
4.8.1.	<i>Design Entry</i>	24
4.8.2.	<i>Design Implementation</i>	24
4.8.3.	<i>Design Verification</i>	24
4.8.4.	<i>Device Configuration</i>	24
4.9.	HDL OVERVIEW	24
4.10.	FPGA DESIGN FLOW	25
4.11.	FUNCTIONAL DESCRIPTION OF PID.....	26
4.12.	SYSTEM MODELING	27
4.12.1.	<i>Model of System</i>	29
4.12.2.	<i>Controller's Model</i>	29
5.	IMPLEMENTATION	31
5.1.	SOFTWARE IMPLEMENTATION.....	32
5.1.1.	<i>Main Module</i>	33
5.1.2.	<i>Cclk</i>	35
5.1.3.	<i>Error Calculator</i>	36
5.1.4.	<i>PID Controller</i>	37
5.1.5.	<i>PWM</i>	41
5.1.6.	<i>Control Unit</i>	42
5.1.7.	<i>Seven Segment Display</i>	44
5.2.	HARDWARE IMPLEMENTATION	46
5.2.1.	<i>Temperature Sensor</i>	46
5.2.2.	<i>A/D Converter</i>	46
5.2.3.	<i>FPGA Spartan 3</i>	47
5.2.4.	<i>Interfacing ADC with FPGA</i>	47
5.3.	IMPLEMENTATION OF CODE ON SPARTAN 3 FPGA	49
5.3.1.	<i>Starting Project</i>	49
5.3.2.	<i>Adding Code</i>	51
5.3.3.	<i>Pin Assignment</i>	52
6.	TESTING	57
6.1.	TESTING THE SYSTEM BY GIVING IT STEP INPUT	57
6.2.	TESTING THE STABILITY	58
6.3.	TESTING THE SYSTEM WITH CONTROLLER.....	59
7.	RESULTS AND DISCUSSIONS	64
7.1.	MODEL SIMULATION	64
7.2.	SYNTHESIS RESULTS	66
7.3.	PERFORMANCE OF SYSTEM	66
8.	CONCLUSION	68
9.	FUTURE WORK	70
10.	APPENDICES	72
11.	LIST OF REFERENCES	82
