ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express our gratitude to our research supervisor, Dr.Humera Farooq for her invaluable advice, guidance and her enormous patience throughout the development of the research.

In addition, we would also like to express our gratitude to our loving parent and friends who had helped and given us encouragement.

LICENSE PLATE RECOGNITION SYSTEM

ABSTRACT

License Plate Recognition (LPR) is a machine vision technology used to identify vehicles by their license plates without direct human intervention. This method is capable of extracting license plates in a concise manner, it works well and fast enough. The method has been tested over a large number of images in order to analyze its performance. The test results, demonstrate that the proposed method is efficient to be used for the license plate recognition system.
