2016

ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, Mr Malik Muhammad Ali for his invaluable advice, guidance and enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

POINT OF SALE

ABSTRACT

The purpose of this application is to develop a computerized Point of Sale System for River Side™ .The mentioned system will ensure the sale transactions to be reliable, faster, and accurate and secure. The POS will provide solution to the complications faced.

POS will provide an elucidation to the problems encountered by the restaurant. The said system will deliver precise details of customer's purchases: generate reports such as daily sales, received products and products sold. The cashier or certified person will benefit from the system. The consumer discussed the problems occurred and helped us make possible solutions using manual system to make it automate to help make transactions easier, faster and accurate.

POS records every transaction when it occurs helping inventory registers are continuously up-to-date. One gets much more information about the sale than one could gather with a manual system. By running reports based on this information, you can make enhanced judgments about gathering and merchandising.

TABLE OF CONTENTS

Table of Contents

CHAPTER 1 10

1 INTRODUCTION 10

1.1 Background 10

1.2 Problem Statements 10

1.3 Aims and Objectives 11

1.4 Scope of Project 11

CHAPTER 2 12

2 LITERATURE REVIEW 12

2.1 Research paper: Mobile Phone as a Point Of Sale Device 12

2.2 Research paper: Automated system and method for point-of-sale (POS) check processing 12

2.3 Research paper: Food order fulfilment system deploying a universal in-store point-of-sale (POS) for preparation and pickup scheduling 13

CHAPTER 3 17

3 DESIGN AND METHODOLOGY 17

3.2 Designing 20

3.3 Evaluation Methodology 28

CHAPTER 4 30

4 IMPLEMENTATION 30

4.1 First Prototype 30

4.2 Second Prototype 31

Responsive Designing 33

Summary of Technical Work 35

4.3 Third Prototype 36

CHAPTER 5 38

RESULTS AND DISCUSSION 38

5.1 Test Cases for Functional Testing (Black Box Testing): 38

5.3 Technical Feasibility 65

6.1 Conclusion 73

6.2 Limitations 73

6.3 Future work 73

5 References 74
