ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my research supervisor, Muhammad Shahid Khan for his invaluable advice, guidance, and his enormous patience throughout the development of the research.

In addition, we would also like to express my gratitude to our loving parent and friends who had helped and given me encouragement.

HUMARA KUTUB MELA (ONLINE BOOK-FAIR PLATFORM)

ABSTRACT

Nowadays, the network is very important in people's lives. As people's living standards rise, so do their expectations of life's quality and efficiency. As a result, traditional bookstores become less convenient, and online bookstores have progressively gained popularity. The online bookstore is a book industry revolution. Because traditional bookshops' operating time, address, and area are limited, the types of books and books to find are restricted. However, the online bookstore changed the traditional bookstore's management mode; if you have a computer, you may buy the book anywhere, saving time and effort and effectively cutting the time of book selection.

The main objective of the project is to create an online book fair that allows users to search and purchase a book online based on title, author, and subject or let them sell their books at a reasonable price. The selected books are displayed in a tabular format and the user can order their books online through credit card payment or cash on delivery. Using this website, the user can purchase a book online instead of going out to a book fair and wasting time.
