ACKNOWLEDGEMENTS

We would like to thank everyone who had contributed to the successful completion of this project. We would like to express my gratitude to my project supervisor, Dr. Raheel Siddiqui for his invaluable advice, guidance, and his enormous patience throughout the development of the research.

In addition, we would also like to express our gratitude to our loving parents and friends who have helped and given us encouragement.

AAMIYANA URDU LUGHAT (URDU+)
(URBAN URDU DICTIONARY)

ABSTRACT

Urdu slang encompasses a dynamic set of informal expressions used by speakers in their daily conversations. Urdu slang adds a layer of colloquialism to communication, serving as a means of connection and identification within communities. These expressions can range from playful and humorous to more serious or contextual, contributing to the richness and diversity of Urdu language usage. Understanding Urdu slang is crucial for a comprehensive grasp of the language, as it unveils the nuances and cultural intricacies embedded in everyday conversations. In the modern digital era, where language learning relies heavily on online platforms, existing resources such as Urban Dictionary fall short in capturing the nuances of Urdu slang within its authentic context. Our aim is to create a participatory and user-friendly platform, drawing inspiration from Wikipedia and Wiktionary, where users can contribute, access, and discuss slang terms. This approach ensures the resource's adaptability to the dynamic nature of slang usage among Urdu speakers, encompassing regional variations. The technological framework encompasses user interface design, search functionality, and a user-generated content model, fostering continuous updates from contributors. It embraces language dynamics and underscores the role of digital platforms in language preservation and education, marking a step towards comprehensive Urdu digitization.
