Session:

2012-2015

Master of Business Administration

Supervisor:

(AJAB KHAN BURKI)

Department of Management Sciences

Bahria University Islamabad

2015

Dedication:

We dedicate this study to our family that supported us during up and downs of our life, special feeling of thankfulness to our caring parents who always encouraged us and supported us throughout our studies.

“There are no secrets to success. It is the result of preparation, hard work, and learning from failure.”

Acknowledgement

All praises for the all mighty Allah who is most beneficent and the most merciful. We would like to give our thankfulness to the supervisor Sir Ajab Khan Burki who due to his support, motivation and knowledge made us complete our Research Project. We also thank to Mrs. Maria Iftikhar for her sincere and friendly guidance and made sure that our Research Project is on the right path. And we are also taking this chance to thank everyone including our dearest Sister especially Mrs.Fiza Sibtain who encouraged and motivated us throughout our Research Project.

Abstract

In emerging economies like Pakistan the commercial bank plays an important role by providing financial services to the individuals and corporate sector. To evaluate and examine the performance of financial institutes specially the banks the most useful tool is ratio analysis and CAMEL analysis is also be considered. For the evaluation of the financial performance of Allied bank limited by keeping financial aspects and elements in view, ratio and CAMEL analysis has been selected as an evaluating tool. The research team used the final reports from the year 2008 to the year 2012 for gathering and interpreting the data for this study. This research work is based on secondary data which is collected from annual reports of ABL bank, past journals about bank's performance and financial books. The financial analysis of Allied bank limited refers that the bank has made a slow progress over the financial year 2008 to the year 2012 as the bank has expended its business in these years and its expenses grow more rapidly than that of income, but the end of the year 2011 bank was in a position where it reduced its interest expenses which ultimately result in increase of its profit.
