A thesis presented to Bahria University, Islamabad in partial fulfilment of the requirements for  
the degree of Master of Philosophy

**June 2015**

## ACKNOWLEDGEMENTS

In the most delicate part of the internal pore, I feel joy, I feel happiness, and I feel gratitude, gratefulness and appreciation to the “One”, the only “One”, My Allah, the Omnipotent, Supreme of all divine, whose mercy has been showered all the way long for the completion of the thesis.

The ardent verses of the Quran and Naat which I mostly recite made me traverse the strains of tough times in which its words cast the real meanings of Prayer and my affiliation with the Holy Prophet, may Peace Be Upon Him. The verses made my prayers get a clearance from the midst of the darkness and got their realization.

Dr. Hafiz Mushtaq Ahmed has been a remarkable supervisor throughout this thesis and his feedback has been a consequence of this little effort! His Eveready and magnanimous help have dependably been inspiring and professional. More than an aide, more than a decent instructor, he has consistently been at my side to listen to whatever I have wished to talk about. He has leaded me to work with truth and honesty and to work with devotion and commitment. His understanding, dedication, patience and multi-thinking approach has made me endeavour to the degree of presenting my proposal in an exceptionally organized and systematic way. Thanks a lot Sir Hafiz Mushtaq Ahmed.

I would like here to mention about the most priceless asset of my life which I have in this whole world and without whom my thesis would have been impossible, “My Parents”.

Thank you Dad and thank you Mummy! For the times when I have been hopeless and you have been the twinkling stars for my hurdles, when in the nights of restlessness and impatient thoughts; you have been there to solace and hug me. My dad has been always one of the paramount mentors of this world.

His experience, huge knowledge of books, qualification and the pride of being self-made has always nourished my mind to be committed to my work with the sanctity in mind to always accomplish the “Best”. I am indebted to my dear mom, for her gallant services at times when I have been too tired, her encouragement and approval for every step of mine has not only always been an anchor to the ship of my triumph, but has also been a lighthouse for the rest of my life.

I would likewise like to extend my heartiest gratitude to Dr. Zahid Mahmood, who was the best mentor I had throughout my M.Phil degree, I missed you in last semester sir!

I would also like to thank my friend Farah for being there for me through all the tough times in my degree of M.Phil. Your love and support kept me going when I was on the verge of quitting. Thank you for all the beautiful memories of the degree.

Last, but certainly not the least, I would like to thank my fiancé Umar Farooq for being the best friend, support and motivator in times of need and for providing all the help I needed for the thesis without any word. Thank you so much, your support means a lot.

Sidra Babar Malik

## **DEDICATION**

I would like to dedicate this thesis to my Holy Prophet Muhammad (S A W) and my “Ammi” and “Abbu”.... There is none other who could make me reach this goal. Your ‘sacrifices, prayers including ‘Nawafil’ made me reach to this height.

Thank You, I love you!

## Abstract

The study attempts to shed light on some of the factors that affect knowledge sharing intention among universities' teaching faculty. In particular, the objective is to fill the research gap through empirical study and integration of factors from two theories Theory of reasoned action (TRA) and theory of planned behaviour (TPB) and their effect on knowledge sharing intention creation, so as to provide a holistic and encompassing view.

**Purpose:** To investigate the factors (attitudes and subjective norms) effecting knowledge sharing among the teaching faculty, along with the study of self-efficacy, perceived extrinsic rewards and social networks as determinants of attitudes toward knowledge sharing and organizational support as determinant of subjective norms, in the public and private sector universities in Pakistan.

**Methodology:** The population of the study is all the faculty members employed in public and private sector universities of Pakistan. The sample for this study is 231 faculty members selected via simple random sampling. SPSS was used to test the hypothesis of the study. Cronbach Alpha's were used for reliability analysis of the variables. Also, demographics and descriptive analysis was done. Hypotheses were tested via use of correlation and regression analysis.

**Results:** The study reveals that attitude and subjective norm are positively and significantly related to knowledge sharing intention. Among other elements, self-efficacy and social networks are positively whereas extrinsic rewards are negatively and significantly related to attitude towards knowledge sharing. In the interim, organizational support has demonstrated solid impact on subjective norms. Also, attitude was found to mediate the relationship between self-efficacy, social networks, perceived extrinsic rewards and intention to share knowledge and subjective norm was found to mediate the relationship between organizational support and intention to share knowledge.

**Significance:** The study adds to the literature by providing a detailed investigation of the dependent and independent variables, based on theories TRA and TPB in more than one

university setting. The findings of these causal relationships provide a better understanding of knowledge sharing phenomenon about the faculty members that makes them realise more efficient use of knowledge sharing cultures, support and propagate it.

**Key Words:** knowledge sharing, knowledge management, theory of reasoned action, theory of planned behaviour, higher education, and knowledge sharing among teachers.
