ABSTRACT

Today the world is facing challenges of increasing environmental issues which are not only impacting our health but also our business and trade. But the environmental management provides solutions for the organizations to develop such tools and strategies that help them out in solving those problems. Corporate Environmental Responsibility (CER) is an emerging tool that helps organizations to adapt environment friendly activities in their routine. This study has analyzed that how the organizations are doing with CER and what is the practical implication of this tool also this study will definitely help the organization in performing their tasks more efficiently and effectively? The theoretical framework is composed of the stakeholder's theory, shareholders theory and the theory of common good and their relationship with research topic.

The current study has chosen Unilever Pakistan and Proctor and Gamble Pakistan to observe their practices to control environmental degradation. Conceptual framework consists of definition of environmental responsibility and the environmental factors that influence the performance of any organization.

Content analysis was used to identify the ongoing practice and processes and their impact on the environment and Semantic differential scale is used to analyze data. The results were not satisfactory in terms of budget allocation for corporate social and environmental responsibility. Hence, it was concluded that these organizations have to meet the international standards to be called environmentally responsible organizations. However recommendations are made to help organizations and open new horizon of research in this area.

ACKNOWLEDGEMENTS

All praises to Allah for the strengths and His blessing in completing this thesis. Special appreciation goes to my supervisor, Ms. Fiza Sarwar, Lecturer, Department of Earth and Environmental Sciences (E&ES), Bahria University, Islamabad for her supervision and constant support. Her invaluable help of constructive comments and suggestions throughout the research works have contributed to the success of this research. Not forgotten, my appreciation to my co-supervisor, Prof. Dr. Zafar Iqbal, Department of Sociology, International Islamic University, Islamabad for his patient guidance, enthusiastic encouragement and useful critiques and knowledge regarding this topic.

Sincere thanks to all my friends and others for their kindness and moral support during my study. Thanks for the friendship and memories.

Last but not least, my deepest gratitude goes to my beloved father; Mr. Ghulam Sarwar Khan and also to my sisters for their endless love, prayers and encouragement.

To those who indirectly contributed in this research, your kindness means a lot to me. Thank you very much.
