

Behavioral Biases & Investment Decisions: Single-Asset VS Portfolio Investors

By

Shaheer Kamal Dar

A thesis presented to Bahria University, Islamabad in partial fulfillment of the requirements for the degree of Ms-Finance.

March, 2017

**SUBMISSION FORM OF THESIS FOR HIGHER RESEARCH DEGREE
BAHRIA UNIVERSITY, ISLAMABAD**

Candidate Name: Shaheer Kamal Dar

I submit three Copies of thesis for examination for the degree of MS-Finance, Thesis titled:

Behavioral Biases & Investment Decisions: Single-Asset VS Portfolio Investors.

Candidate Signature: _____ Date: _____

Certificate of Principal Supervisor

I Dr. Taqadus Bashir being the principal Supervisor for the above student certifies that thesis is in a form suitable for examination and that the candidate has pursued his course in accordance with the Rules of the University.

Signature: _____ Date: _____

Recommendation for Examination

I recommend that the thesis be examined.

Principal Supervisor: Dr. Taqadus Bashir Date: _____

Co-Supervisor: _____ Date: _____

Not Recommended for Examination

I recommend that the thesis be examined.

Principal Supervisor: _____ Date: _____

Co-Supervisor: _____ Date: _____

Statement by the Head Faculty/Department

I support the submission of the thesis of the above-named student for examination under the University Rules for higher degrees.

Signature: _____ Date: _____

BAHRIA UNIVERSITY, ISLAMABAD

APPROVAL SHEET

SUBMISSION OF HIGHER RESEARCH DEGREE THESIS

Candidate's Name: Shaheer Kamal Dar

Discipline: MS-Finance

Faculty/Department: Management Sciences

I hereby certify that the above candidate's work, including the thesis, has been completed to my satisfaction and that the thesis is in a format and of an editorial standard recognized by the faculty/department as appropriate for examination.

Signature(s):

Principal Supervisor: _____

Date: _____

The undersigned certify that:

1. The candidate presented at a pre-completion seminar, an overview and synthesis of major findings of the thesis, and that the research is of a standard and extent appropriate for submission as a thesis.
2. I have checked the candidate's thesis and its scope, format; the faculty/department recognizes editorial standards as appropriate.

Signature(s):

Dean/Head of Faculty/Department:

Date: _____

DECLARATION OF AUTHENTICATION

I, Shaheer Kamal Dar, Ms/M.Phil.Student in the Department of Management Sciences, Bahria University. Islamabad, certify that the research work presented in this thesis is to the best of my knowledge my own. All sources used and any help received in the preparation of this dissertation have been acknowledged. I hereby declare that I have not submitted this material, either in whole or in part, for any other degree at this or other institution.

Signature: _____

Date: _____

ACKNOWLEDGEMENTS

First and foremost, I would acknowledge my limitless thanks to Allah, the Ever-Magnificent; the Lord of the worlds, for His help and blessings.

I would like to express my gratitude to Associate Professor Dr. Taqadus Bashir who has been the ideal research supervisor. Her sage advice, intuitive criticisms, and persistent encouragement aided the writing of this research in numerous ways. I would like to thank Dr. Taqadus Bashir whose steadfast support for this study was greatly needed and deeply appreciated. I also would like to express my wholehearted thanks to all my beloved friends and family, who have been so supportive along the way of doing my research. Because of their unconditional love and support, I have the chance to complete this research.

Shaheer Kamal Dar

DEDICATION

This thesis is dedicated to my father, who always pushed me when I was feeling down, who saw potential in me to reach this far and also taught me that the best kind of knowledge to have is that through which others can also suffice. It is also dedicated to mine and all the mothers around the world who sacrificed their lives so that we can fulfill our dreams. Last but not the least, it is dedicated to Dr. Taqadus Bashir, without her dedicated support and supervision it would not have been possible.

Abstract

Behavioral biases affecting investment decisions are no longer a delusion as there are many studies confirming the existence of behavioral factors. This research also has a purpose of pointing out and testing the presence of selected behavioral biases in investors. This study includes the investors who invest their money in a single asset in comparison to those investors who make investment in multiple assets creating a portfolio to diversify their risk and reducing the chances of total loss in case of bearish trend in the market. Biases selected for this research consists mainly of cognitive and emotional biases which are further divided into seven categories including three cognitive biases (self-attribution, illusion of control, mental accounting bias) and four emotional biases (loss aversion, regret aversion, optimism and status quo bias). This is a descriptive research so a well-structured questionnaire is used to collect the primary data. Questionnaires were distributed among 400 respondents, 251 of which consist of multiple assets while 149 were those who have investment in a single asset. The reliability of the items used in the questionnaire is tested using Cronbach's alpha and correlation of items with their corresponding variable is also tested, further the statistical tools which are used to test the influence of behavioral biases on investors decisions includes regression analysis. The strength of the relationship between variables is tested through correlation. T-test is used to measure the individual significance of variables. Results of the research indicate that investors are affected by behavioral biases while making investment decisions. Research also indicate the presence of self-attribution, illusion of control, loss-aversion and regret aversion bias in multiple-asset investors while the single-asset investors are affected by loss-aversion and status quo bias. Loss-aversion is the only common bias found in both single-asset and multiple-asset investors. Results of correlation indicate moderate positive relationship between behavioral biases and investment decision making.

Keywords: Behavioral biases, investment decisions, single-asset investors, multiple-asset/portfolio investors.
