Acknowledgements

I want to recognize my supervisor Ms. Uzama Shams and Mr. Kashir Asghar the head of the Research Cell, who should be acknowledged for their unconditional cooperation and support, especially for accommodating me to facilitate a successful completion of my thesis and submission.

I owe a special debt of gratitude to them. And, last but not least all those respondents who so willingly answered my queries were of a huge assistance in making my thesis.

Abstract

This paper probes into the gender discrimination issue in the telecom sector of Pakistan, which is in fact one of the fastest growing sectors of the economy.

The study explores the variables that initiate and reinforce gender discrimination and the extent to which gender discrimination exists in the sector today.

Respondents from four cellular-service providing companies were approached to fill a total of 100 questionnaires, with approximately equal number of males and females.

The research further investigates the effect of gender discrimination on job satisfaction. Since gender discrimination in this sector has had no previous research I consider this research vital to understand its impact on job satisfaction, employee productivity and employee retention for companies in the sector and beyond.
