Acknowledgement:

Praise to Almighty ALLAH who is most merciful and beneficent. I am thankful to my Almighty ALLAH who gave me strength and knowledge in completion of my Thesis and removed all the problems I had during my Research paper and in making my Report.

I would like to dedicate my effort for my parents who supported me at each and every step of my entire career and who prayed for me in their each and every second, I would dedicate them because they are the real heroes of my life.

I would be thankful to my teachers who not only supported me; they make me a person to show the entire thing that I can do something and they build me up to face any kind of challenge for my entire life and gave me knowledge that I applied on my Research. Specially I am thankful to **Madam SaherZeast** who supported me at each and every step of my Thesis and Madam was the one which showed me a direction that I didn't expected to achieve. I am thankful to Madam DrSimreen, she helped me out in resolving the issues related to data analysis and results. I am also thankful to other teachers of finance department who helped me out in resolving my mistakes. I am also thankful to my friend TanveerIllahi who helped me out in determining the correct variables and solve my problems which I faced during my research period.

ABSTRACT

The purpose of research was to find out the impact of financial leverage on the performance of textile firms. For this purpose data is taken from 2007 to 2016 and regression analysis which includes fix and random effect model has been used to analyze the results. Return on assets was taken as the dependent variable while, financial leverage and liquidity ratios were independent variables. The results showed a significant positive relationship between leverage and performance of the firm ($P<0.05$).
