ABSTRACT

- ❑ Export Management System (EMS) is the Management Information System, which will act as a focal point not only for the business of M.K. Sons but may also result fabulously for any textile industry.
- ❑ This software primarily focuses on Cloth Export. Export Management System is meant for complete MIS oriented Export Package, that could address its entire requirement necessary to take Managerial decision. Thus in a way, it can be considered as decision support system, producing documentations and database requisitions as well.
- ❑ It's fully equipped with a full variety of reports covering all the scope of the subject.
- ❑ User-friendly environment provides ease in data manipulation. A complete view of the database is provided at every level.
